

7.3 Institutional Distinctiveness- **COVID protocol ID card**

A new and innovative idea that has been introduced in the year 2021 by MNRMCH is **Covid-19 protocol ID card**, a preventive measure which ensures proper identification and isolation of infected students. It has been made mandatory for all the students to have the ID card to permit the students to attend physical classes during ongoing pandemic as a safety protocol. This also helps in attaining maximum attendance of the students to the classes during the same period. This initiative enables both the teachers and students to comfortably and safely conduct the classes in this uncertain times.

The ID card is issued to the student when he/she meets all of the following criteria:

- 1) Only after the student is tested negative for COVID-19 by RT-PCR from ICMR approved lab within 72 hours of attending the classes.
- 2) The student should immunized against COVID-19 with at least first dose of the vaccine.
- 3) Consent from the parent

This enables students and the teachers to enter the campus without worrying about risk of infection. This also ensures the parents that we are hereby providing a safe environment for study, education and development of their kin. The institution also took an additional step to quarantine students from outside the state.

Hence, to conclude, it is evident that MNR Medical College & Hospital has been swift when it comes to following the COVID regulations for the safety and maintenance its high standards of academic excellence while doing so.

MNR MEDICAL COLLEGE & HOSPITAL

MNR Nagar, Narsapur Road, Sangareddy-502 294.
