

**Institution: MNR MEDICAL COLLEGE & HOSPITAL**  
**MBBS 1st year - May (2022) classes Teaching Schedule**

| Day                     | Competency | 9:00-10:00                                | 10:00 - 11:00                      | 11:00 - 01:00                   | 1:00-1:30 pm | Practicals   |                     |
|-------------------------|------------|---|------------------------------------|---------------------------------|--------------|--|---------------------|
|                         |            |   |                                    |                                 |              | 1:30-2:30 pm   | 2:30-3:30 pm        |
| Monday, May 02, 2022    | Competency | Physiology                                | Anatomy                            | Anatomy                         |              | Practicals   | Practicals          |
|                         | Topic      | Transport mechanisms across cell membrane | Brachial plexus                    | Upper limb dissection           |              | Haemocytometer & Histology Practical                               |                     |
|                         | Faculty    | Dr.Hemalatha                              | Dr.GCN Raju                        | All Faculty                     |              | All Faculty  |                     |
| Tuesday, May 03, 2022   | Competency | Physiology                                | Theory                             | Practicals                      |              | Practicals   |                     |
|                         | Topic      | Theory                                    |                                    |                                 |              |  |                     |
|                         | Faculty    |   |                                    |                                 |              |  |                     |
| Wednesday, May 04, 2022 | Competency | SPM (Theory)                              | Anatomy                            | Anatomy                         |              | Physiology/Biochemistry  |                     |
|                         | Topic      | Median negave carpal tunnel syndrome      | Self Directed Learning Homeostasis | Upper limb dissection           |              | Haemocy tometer & Estimation of the constituents of Abnormal urine |                     |
|                         | Faculty    | Dr.RK                                     | Dr.Hari                            | All Faculty                     |              | All Faculty/ Dr.PNB  |                     |
| Thursday, May 05, 2022  | Competency | Biochemistry                              | Physiology                         | Anatomy                         |              | Physiology/Biochemistry  |                     |
|                         | Topic      | Colorimeter & spectrophotometer           | Homeostasis                        | Upper limb dissection           |              | Haemocy tometer & Estimation of the constituents of Abnormal urine |                     |
|                         | Faculty    | Dr.RK                                     | Dr.Hari                            | All Faculty                     |              | All Faculty/ Dr.PNB  |                     |
| Friday, May 06, 2022    | Competency | Anatomy                                   | Physiology                         | Practicals                      |              | Practicals   |                     |
|                         | Topic      | Cubital fossa                             | Intercellular communications       | Profession development & Ethics |              | Integrated Teaching  | Bridge course class |
|                         | Faculty    | Dr.PV Rao                                 | Dr.Hari                            |                                 |              | Dr.Hemalatha & Dr.Hari   |                     |
| Saturday, May 07, 2022  | Competency | Anatomy                                   | Biochemistry                       | Early clinical exposure         |              | Physiology   |                     |
|                         | Topic      | Weekly formative assessment exam          | Weekly formative assessment exam   |                                 |              | Exam   |                     |
