### About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

## A ONE WEEK CERTIFICATE PROGRAM ON BASIC LIFE SUPPORT

### FINAL ASSESSMENT TEST

NAME:

YEAR / SEM:

REG.NO:

DATE:

TIME: 30 Minutes

MARKS: 30

Tick the Correct Answer

1. What is the compression to breath ratio in two-person CPR for an adult?
  - a) 20:2
  - b) 30:2
  - c) 15:2
  - d) 25:2
2. How often should rescuers switch roles when performing two-rescuer adult CPR?
  - a) After every cycle of CPR
  - b) After every two cycles of CPR
  - c) After every five cycles of CPR
  - d) After every 10 cycles of CPR
3. Where should you attempt to perform a pulse check in a child who is anywhere from one year to puberty?
  - a) Brachial artery
  - b) Ulnar artery
  - c) Temporal artery
  - d) Carotid
4. You are performing CPR on an adult victim. The second rescuer has arrived with the AED and turned it on. What is their next step?
  - a) Place the pads over the victim's clothes
  - b) Wait for advanced care to arrive before continuing use of the AED
  - c) Place the pads on the victim's bare chest
  - d) Shock the victim

  
Chairperson  
Internal Quality Assurance Cell (IQAC)  
MNR Medical College & Hospital

  
PRINCIPAL  
MNR MEDICAL COLLEGE & HOSPITAL  
FASALWADI, SANGAREDDY-50229.

5. Rescue Breathing is used for a victim who is unconscious but has a pulse. What is the correct rate for rescue breathing in a child or infant?
- 1 breath every 5 to 6 seconds
  - 2 breaths every 3 to 5 seconds
  - 1 breath every 3 to 5 seconds
  - 2 breaths every 5 to 6 seconds
6. What is the correct hand placement for compressions on an infant victim?
- Use 2 hands when performing compressions on an infant
  - Use two fingers when performing compressions on an infant
  - Use one hand when performing compressions on an infant
  - Do not give compressions on an infant
7. You are alone and find a potential victim. What is your first step?
- Begin Chest Compressions
  - Ensure scene safety
  - Check for responsiveness
  - Open the airway and give 2 breaths
8. What is the correct rate of compressions?
- 100
  - 40
  - 80
  - 60
9. During CPR on an adult victim, the compression-to-breath ratio is:
- Give 1 breath after every 5 compressions
  - Give 2 breaths after every 30 compressions
  - Give 3 Breaths after every 15 compressions
  - Give 2 breaths after every 100 compressions
10. When should you use the two thumb-encircling hands technique on an infant?
- When there are 2 rescuers present for CPR
  - When your fingers get tired of compressions
  - When you want to produce less blood flow in the infant
  - When you are trying to relieve choking in the infant

11. You have noticed a potential victim and ensured the scene is safe. What is your next step?
- a) Provide rescue breathing
  - b) Check for victim's responsiveness
  - c) Begin chest compressions
  - d) Call the victim's doctor
12. Use abdominal thrusts to relieve choking in a conscious adult. State true or false.
- a) True
  - b) False
13. You are giving CPR to a 5-year-old child. A second rescuer comes by and states they know CPR. What happens to your Compression to Breath ratio when you add the second rescuer?
- a) It changes - 15 compressions to 2 breaths
  - b) It changes - 30 compressions to 3 breaths
  - c) It changes - 5 compressions to 1 breath
  - d) It stays the same - 30 compressions to 2 breaths
14. After the AED has delivered the shock you should...
- a) Continue CPR beginning with compressions
  - b) Wait patiently for the AED to reanalyze
  - c) Give 2 breaths
  - d) Turn off the AED
15. The 2015 AHA guidelines for CPR recommended BLS sequence of steps are:
- a) Chest compressions, Airway, Breathing
  - b) None of the above
  - c) Airway, Breathing, Check pulse
  - d) Airway, Breathing, Chest compressions
16. The pulse assessed in an adult cardiac arrest victim is called the \_\_\_\_\_ pulse?
- a) Groin
  - b) Radial
  - c) Carotid
  - d) Tempora

  
Chairperson  
Internal Quality Assurance Cell (IQAC)  
MNR Medical College & Hospital

  
PRINCIPAL  
MNR MEDICAL COLLEGE & HOSPITAL  
FASALWADI, SANGAREDDY-502294

17. You find an unresponsive victim without a pulse. You do not have a mask. What is the next step for an untrained lay responder?
- a) Go call 911
  - b) Wait until EMS arrives
  - c) Begin CPR and perform mouth-to-mouth
  - d) Use your shirt over their mouth as a barrier
18. What is the correct compression-to-ventilation ratio for Two-Rescuer Infant BLS?
- a) 30:2
  - b) 30:1
  - c) 15:2
  - d) 15:1
19. You are treating an adult choking victim. They initially can cough, but now are grasping their throat and turning blue. What is the next step?
- a) Heimlich Maneuver
  - b) Begin CPR
  - c) Rescue breathing
  - d) Check pulse
20. The five steps in the Adult Chain of Survival include all of the following EXCEPT:\*
- a) Early CPR
  - b) Rapid defibrillation
  - c) Advanced airway placement
  - d) Integrated post-cardiac arrest care
21. Which of the following are signs of airway obstruction?\*
- a) Poor air exchange
  - b) High-pitched noise while inhaling
  - c) Inability to speak
  - d) All of the above
22. After delivering a shock with an AED, what is the next step in caring for a person?\*
- a) Reassess for a pulse.
  - b) Do chest compressions only.
  - c) Resume CPR.
  - d) Do ventilation only.

23. Over what age should you use 'Adult' AED pads?
- a) 8 years old
  - b) 12 years old
  - c) 18 years old
  - d) 21 years old
24. Efforts to relieve choking should be stopped when:
- a) The obstruction is removed
  - b) The victim becomes unresponsive
  - c) The victim begins breathing normally
  - d) Any of the above occurs
25. In 2-rescuer CPR, where the patient is between 1 years old and puberty, the chest compression to breaths ratio is:
- a) 15:1
  - b) 15:2
  - c) 30:1
  - d) 30:2
26. CPR is initiated and the victim's pulse returns but he is not breathing. What ventilation rate should be used for this patient?
- a) 8 per minute
  - b) 12 per minute
  - c) 20 per minute
  - d) Depends on his color
27. What does AED stand for?
- a) Automatic Energy Delivery
  - b) Automated External Device
  - c) Automated External Defibrillator
  - d) Autonomous Energy Defibrillator
28. The 5 links in the adult Chain of Survival include all of the following EXCEPT:
- a) Early CPR
  - b) Rapid Defibrillation
  - c) Use of Cardiovascular Medications
  - d) Integrated Post-Cardiac Arrest Care

29. When do you phone the emergency response number if you are alone with an unresponsive infant?
- a) after 5 cycles of CPR
  - b) after 1 cycle of CPR
  - c) immediately
  - d) after you give 2 breaths
30. Which of the following statements best describes the benefit of rescue breathing?
- a) Rescue breathing will help overcome any airway obstruction that may be blocking the airway
  - b) Rescue breathing will maintain completely normal oxygenation for the victim
  - c) Rescue breathing might defibrillate the heart
  - d) Rescue breathing is an effective way to provide oxygen to the victim

## A ONE WEEK CERTIFICATE PROGRAM ON BASIC LIFE SUPPORT

### FINAL ASSESSMENT TEST

NAME:

YEAR / SEM:

REG.NO:

DATE:

TIME: 30 Minutes

MARKS: 30

Tick the Correct Answer

1. What is the compression to breath ratio in two-person CPR for an adult?
  - a) 20:2
  - b) 30:2**
  - c) 15:2
  - d) 25:2
2. How often should rescuers switch roles when performing two-rescuer adult CPR?
  - a) After every cycle of CPR
  - b) After every two cycles of CPR**
  - c) After every five cycles of CPR
  - d) After every 10 cycles of CPR
3. Where should you attempt to perform a pulse check in a child who is anywhere from one year to puberty?
  - a) Brachial artery**
  - b) Ulnar artery
  - c) Temporal artery
  - d) Carotid
4. You are performing CPR on an adult victim. The second rescuer has arrived with the AED and turned it on. What is their next step?
  - a) Place the pads over the victim's clothes
  - b) Wait for advanced care to arrive before continuing use of the AED
  - c) Place the pads on the victim's bare chest**
  - d) Shock the victim

5. Rescue Breathing is used for a victim who is unconscious but has a pulse. What is the correct rate for rescue breathing in a child or infant?
- a) 1 breath every 5 to 6 seconds
  - b) 2 breaths every 3 to 5 seconds
  - c) 1 breath every 3 to 5 seconds**
  - d) 2 breaths every 5 to 6 seconds
6. What is the correct hand placement for compressions on an infant victim?
- a) Use 2 hands when performing compressions on an infant
  - b) Use two fingers when performing compressions on an infant**
  - c) Use one hand when performing compressions on an infant
  - d) Do not give compressions on an infant
7. You are alone and find a potential victim. What is your first step?
- a) Begin Chest Compressions
  - b) Ensure scene safety**
  - c) Check for responsiveness
  - d) Open the airway and give 2 breaths
8. What is the correct rate of compressions?
- a) 100**
  - b) 40
  - c) 80
  - d) 60
9. During CPR on an adult victim, the compression-to-breath ratio is:
- a) Give 1 breath after every 5 compressions
  - b) Give 2 breaths after every 30 compressions**
  - c) Give 3 Breaths after every 15 compressions
  - d) Give 2 breaths after every 100 compressions
10. When should you use the two thumb-encircling hands technique on an infant?
- a) When there are 2 rescuers present for CPR
  - b) When your fingers get tired of compressions
  - c) When you want to produce less blood flow in the infant
  - d) When you are trying to relieve choking in the infant

  
**Chairperson**  
Internal Quality Assurance Cell (IQAC)  
MNR Medical College & Hospital

  
**PRINCIPAL**  
MNR MEDICAL COLLEGE & HOSPITAL  
FASALWADI, SANGAREDDY-502294

11. You have noticed a potential victim and ensured the scene is safe. What is your **next** step?
- a) Provide rescue breathing
  - b) Check for victim's responsiveness
  - c) Begin chest compressions
  - d) Call the victim's doctor
12. Use abdominal thrusts to relieve choking in a conscious adult. State true or false.
- a) **True**
  - b) False
13. You are giving CPR to a 5-year-old child. A second rescuer comes by and states they know CPR. What happens to your Compression to Breath ratio when you add the second rescuer?
- a) **It changes - 15 compressions to 2 breaths**
  - b) It changes - 30 compressions to 3 breaths
  - c) It changes - 5 compressions to 1 breath
  - d) It stays the same - 30 compressions to 2 breaths
14. After the AED has delivered the shock you should...
- a) **Continue CPR beginning with compressions**
  - b) Wait patiently for the AED to reanalyze
  - c) Give 2 breaths
  - d) Turn off the AED
15. The 2015 AHA guidelines for CPR recommended BLS sequence of steps are:
- a) Chest compressions, Airway, Breathing
  - b) None of the above
  - c) Airway, Breathing, Check pulse
  - d) **Airway, Breathing, Chest compressions**
16. The pulse assessed in an adult cardiac arrest victim is called the \_\_\_\_\_ pulse?
- a) Groin
  - b) Radial
  - c) **Carotid**
  - d) Tempora

  
Chairperson  
Internal Quality Assurance Cell (IQAC)  
MNR Medical College & Hospital

  
**PRINCIPAL**  
MNR MEDICAL COLLEGE & HOSPITAL  
FASALWADI, SANGAREDDY-502294

17. You find an unresponsive victim without a pulse. You do not have a mask. What is the next step for an untrained lay responder?
- a) Go call 911
  - b) Wait until EMS arrives
  - c) Begin CPR and perform mouth-to-mouth**
  - d) Use your shirt over their mouth as a barrier
18. What is the correct compression-to-ventilation ratio for Two-Rescuer Infant BLS?
- a) 30:2
  - b) 30:1
  - c) 15:2**
  - d) 15:1
19. You are treating an adult choking victim. They initially can cough, but now are grasping their throat and turning blue. What is the next step?
- a) Heimlich Maneuver**
  - b) Begin CPR
  - c) Rescue breathing
  - d) Check pulse
20. The five steps in the Adult Chain of Survival include all of the following EXCEPT:\*
- a) Early CPR
  - b) Rapid defibrillation
  - c) Advanced airway placement**
  - d) Integrated post-cardiac arrest care
21. Which of the following are signs of airway obstruction?\*
- a) Poor air exchange
  - b) High-pitched noise while inhaling
  - c) Inability to speak
  - d) All of the above**
22. After delivering a shock with an AED, what is the next step in caring for a person?\*
- a) Reassess for a pulse.
  - b) Do chest compressions only.
  - c) Resume CPR.**
  - d) Do ventilation only.

  
**Chairperson**  
Internal Quality Assurance Cell (IQAC)  
MNR Medical College & Hospital

  
**PRINCIPAL**  
MNR MEDICAL COLLEGE & HOSPITAL  
FASALWADI, SANGAREDDY-502294

23. Over what age should you use 'Adult' AED pads?
- a) **8 years old**
  - b) 12 years old
  - c) 18 years old
  - d) 21 years old
24. Efforts to relieve choking should be stopped when:
- a) The obstruction is removed
  - b) The victim becomes unresponsive
  - c) The victim begins breathing normally
  - d) **Any of the above occurs**
25. In 2-rescuer CPR, where the patient is between 1 years old and puberty, the chest compression to breaths ratio is:
- a) 15:1
  - b) **15:2**
  - c) 30:1
  - d) 30:2
26. CPR is initiated and the victim's pulse returns but he is not breathing. What ventilation rate should be used for this patient?
- a) 8 per minute
  - b) **12 per minute**
  - c) 20 per minute
  - d) Depends on his color
27. What does AED stand for?
- a) Automatic Energy Delivery
  - b) Automated External Device
  - c) **Automated External Defibrillator**
  - d) Autonomous Energy Defibrillator
28. The 5 links in the adult Chain of Survival include all of the following EXCEPT:
- a) Early CPR
  - b) Rapid Defibrillation
  - c) **Use of Cardiovascular Medications**
  - d) Integrated Post-Cardiac Arrest Care

MNR Medical College & Hospital

  
PRINCIPAL  
MNR MEDICAL COLLEGE & HOSPITAL  
FASALWADI, SANGAREDDY-502294

29. When do you phone the emergency response number if you are alone with an unresponsive infant?
- a) after 5 cycles of CPR
  - b) after 1 cycle of CPR
  - c) immediately**
  - d) after you give 2 breaths
30. Which of the following statements best describes the benefit of rescue breathing?
- a) Rescue breathing will help overcome any airway obstruction that may be blocking the airway
  - b) Rescue breathing will maintain completely normal oxygenation for the victim
  - c) Rescue breathing might defibrillate the heart
  - d) Rescue breathing is an effective way to provide oxygen to the victim**

## PROGRAM REPORT

Name of the Event : A One week Certificate Program on "Basic Life Support"

Date : 12.07.2021 to 17.07.2021

Resource Person : Dr. Adam

Professor / Anesthesia,

MNR Medical College

Email ID: adam@gmail.com

Name of the Coordinator: Dr. Syed

Number of Students attended: 150

Venue: Lecture Hall

### **OBJECTIVE OF THE PROGRAM:**

- The aim of basic life support includes preserving life, preventing injury from getting worse, aiding recovery, relieving pain, and protecting the unconscious. The main objective is to save lives.
- The major objective of BLS is to provide oxygen to the heart and the brain and to sustain tissue viability until definitive electrical or medical treatment.
- Basic Life Support (BLS) course provides healthcare providers and public safety professionals the knowledge and skills necessary to respond to breathing and cardiac emergencies in adult, child and infant patients.

### **TOPICS COVERED:**

- Introduction, Basic Concepts.
- CPR (Cardiopulmonary resuscitation) in adults.
- CPR (Cardiopulmonary resuscitation) in Pediatrics and Infants.
- Cardiac Arrest.
- AED (Automated external defibrillator) for adults and infants.
- Foreign Body.

### OUTCOME OF THE PROGRAM:

At the end of the program, the student will be able to

- Improve knowledge and skills related to basic life support practices in students. Periodic basic life support training is very important for competency in this area among students.
- Recognize an emergency situation. Identify, assess and minimize immediate hazards to self and others. Assess the casualty and recognize the need for CPR. Seek assistance from emergency services.

## About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

## Objectives of the Programme:

- To protect the risk of spreading diseases.
- To protect the health and well-being of health care workers and the community.
- To protect against injury and potentially fatal infection.
- To provide environment-friendly waste management solutions.
- To promote the quality and sustainability of the environment.

## Topics to be Covered

- Segregation
- Storage and Transport.
- Treatment methods.
- Waste disposal.
- Types of Biomedical waste.
- Waste management.

## A ONE WEEK CERTIFICATE PROGRAM ON BIOMEDICAL WASTE MANAGEMENT FINAL ASSESSMENT TEST

NAME:

REG.NO:

TIME: 30 Minutes

Tick the Correct Answer

YEAR / SEM:

DATE:

MARKS: 30

1. Which of the following area has the lowest chance of producing a biomedical waste?
  - a) Hospitals
  - b) Clinics
  - c) Laboratories
  - d) Agricultural lands
2. Which of the following is not a Biomedical waste?
  - a) Animal waste
  - b) Microbiological waste
  - c) Chemical waste
  - d) Domestic waste
3. Which of the following should not be mixed with other wastes to avoid contamination?
  - a) Tarry residue
  - b) Oily sludge
  - c) Animal waste
  - d) Vegetable oil
4. Which of the following is not a waste treatment method for biomedical wastes?
  - a) Incineration
  - b) Chemical disinfecting
  - c) Autoclaving
  - d) Sieving
5. Which of the integrated waste management is reduced on an individual level?
  - a) Source reduction
  - b) Recycling
  - c) Disposal
  - d) Burning
6. The term ISWM refers to
  - a) International Solid Waste Management
  - b) Integrated Solid Waste Management
  - c) Integrated Solid Waste Machine

**Chairperson**  
Internal Quality Assurance Cell (IQAC)  
MNR Medical College & Hospital

**PRINCIPAL**  
MNR MEDICAL COLLEGE & HOSPITAL  
FASALWADI, SANGAREDDY-502294

- d) International Solid Waste Mechanism
7. Which gas produced in open dumps from the decomposition of biodegradable waste?
    - a) Ethane
    - b) Methane
    - c) Propene
    - d) None of these
  8. What is called for the process of burning municipal solid waste in a properly designed furnace under suitable temperature and operating conditions?
    - a) Landfill
    - b) Recycling
    - c) Vermi composting
    - d) Incineration
  9. How does organic material in the buried solid waste will decompose?
    - a) By the action of oxidation
    - b) By the action of microorganisms
    - c) By the flow of water
    - d) By the soil particles
  10. Why plastics are difficult to recycle?
    - a) Because it is very hard material
    - b) Because it is very adhesive in its nature
    - c) Because of different types of polymer resins
    - d) Because of different sizes of plastic
  11. The term 'Municipal Solid Waste' is used to describe which kind of solid waste?
    - a) Hazardous
    - b) Toxic
    - c) Non hazardous
    - d) Non toxic
  12. Social, economical and ecological equity is the necessary condition for achieving
    - a) Social development
    - b) Economical development
    - c) Sustainable development
    - d) Ecological development
  13. Cytotoxic and expired drugs are disposed of by
    - a) Dumping
    - b) Autoclave
    - c) Incineration
    - d) Chemical Disinfection
  14. Autoclaving and microwaving are done for which of the following types of medical waste
    - a) Human Anatomical Waste
    - b) Recyclable Contaminated Waste
    - c) Cytotoxic Drugs
    - d) Microbiological Waste
  15. Amount of waste infectious produced in hospitals \_.
    - a) 45%
    - b) 65%
    - c) 80%
    - d) 100%
  16. Which vaccination should be given to workers who deal with biomedical waste?
    - a) HbsAg
    - b) tetanus

**Chairperson**  
Internal Quality Assurance Cell (IQAC)  
MNR Medical College & Hospital

**PRINCIPAL**  
MNR MEDICAL COLLEGE & HOSPITAL  
FASALWADI, SANGAREDDY-502294

- c) rabies  
d) both 1 and 2
17. Which of these explains biomedical Waste Management?  
a) It prevents infections from used products or waste in the hospitals.  
b) It is a way to reduce the spread of diseases  
c) It's a way to reduce amputation of legs  
d) None of the above
18. Size of dust particles reaching alveoli  
a) <5 microns  
b) 5-10 microns  
c) >15 microns  
d) 10-15 microns
19. Which among the following organism is not used for validation of biomedical waste disposed of by incineration?  
a) Bacillus atropheus  
b) Bacillus subtilis  
c) Proteus mirabilis  
d) Geobacillus stearothermophilus
20. Mixing of biomedical waste with less toxic substance to reduce its toxicity is called as  
a) Grounding  
b) Compacting  
c) Inertisation  
d) Pasteurization
21. Drought affected area leads to this vitamin deficiency  
a) Vitamin A  
b) Vitamin B  
c) Vitamin C  
d) Vitamin D
22. What container would you choose for a placenta?  
a) Red pail  
b) Grey tote  
c) Yellow pail  
d) Regular waste
23. Potentially toxic waste contains  
a) Radioactive waste  
b) Chemical waste  
c) Pharmaceutical waste  
d) All of the above
24. Single-use waste containers should be classified as  
a) Sharps container  
b) Waste-holding plastic bag  
c) Cardboard container  
d) All of the above
25. \_\_\_\_\_ is the process and policy of reducing the amount of waste produced by a person or a society.  
a) Waste minimization  
b) Land Filling  
c) Air Pollution  
d) Water Segregation

**Chairperson**  
Internal Quality Assurance Cell (IQAC)  
MNR Medical College & Hospital

  
**PRINCIPAL**  
MNR MEDICAL COLLEGE & HOSPITAL  
FASALWADI, SANGAREDDY-502294

26. \_\_\_\_\_ can cause air, water and soil pollution.
- Biomedical waste
  - Radioactive waste
  - Chemical waste
  - Pharmaceutical waste
27. Which is the correct order of disaster management
- Disaster Impact→Mitigation→Rehabilitation→Response
  - Disaster Impact→Response→Rehabilitation→Mitigation
  - Disaster Impact→Rehabilitation→Mitigation→Response
  - None of the Above
28. Pre-placement examination in dye industry includes all of the following except –
- Asthma
  - Anemia
  - Precancerous lesion
  - Dermatitis
29. The minimum duration of developing coal minor pneumoconiosis is \_\_\_\_\_
- 2–4 years
  - 4–6 years
  - 8–10 years
  - More than 10 years
30. Which is true about biomedical Waste Management?
- Hazardous waste
  - Infectious waste
  - Bio waste
  - All of the above

**Name of the Event: A One week Certificate Program on "Biomedical Waste Management"**

**Date : 11.10.2021 to 16.10.2021 Resource Person**

: Dr. Nagaiah

Professor & Head / SPM,

Dr. Rajesh Gaikwad,

Associate Professor / SPM

MNR Medical College

Email ID: nagaiah@gmail.com

Name of the Coordinator: Dr. Syed

Number of Students attended:

Venue: Lecture Hall

### **OBJECTIVE OF THE PROGRAM:**

- To protect the risk of spreading diseases.
- To protect the health and well-being of health care workers and the community.
- To protect against injury and potentially fatal infection.
- To provide environment-friendly waste management solutions.
- To promote the quality and sustainability of the environment.

### **TOPICS COVERED:**

- Segregation
- Storage and Transport.
- Treatment methods.
- Waste disposal.
- Types of Biomedical waste.

  
Chairperson  
Internal Quality Assurance Cell (IQAC)  
MNR Medical College & Hospital

  
PRINCIPAL  
MNR MEDICAL COLLEGE & HOSPITAL

## About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

MNR Hospital is a 700-bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

## Objectives of the Programme:

- To make the students confident of speaking in English impeccably and with utmost enthusiasm.
- To familiarize the students with different styles of communication.
- To enlighten the students with the seven concepts of communication.
- To make the students understand the nuances of communication.
- To train the students and make them comprehend various aspects of Interview skills.

## Topics to be Covered

- Introduction
- Active Listening
- Developing Assertiveness
- Assertive Verbal Skills-Dealing with Manipulation
- Barriers to effective communication
- Communicating with confidence.

## A VALUE ADDED COURSE ON COMMUNICATION SKILLS

### FINAL ASSESSMENT TEST

NAME:

REG.NO:

TIME: 30 Minutes

YEAR / SEM:

DATE:

MARKS: 30

#### Tick the Correct Answer

- Which of these is not an information based system?
  - MIS
  - DSS
  - SIS
  - SDS
- Which of these factors is not required for communication growth?
  - Growth in size of organisation
  - Negative atmosphere
  - Globalisation
  - Public relations
- Globalization, growth of trade unions, public relations and a positive atmosphere are some of the factors that enable \_\_\_\_\_.
  - Good friendships
  - Happiness
  - Isolation from society
  - Communication growth
- Which of these does not come under behavioural sciences?
  - Globalization
  - Psychology
  - Sociology
  - Transactional Analysis
- For effective communication, which of these commandments should one not follow?
  - Objective of communication
  - Inadequate medium
  - Clarity
  - Adequate medium
- Which of these must be avoided for effective communication?
  - Sharing of activity
  - Listening
  - Ambiguity
  - Politeness
- Which of these is not a commandment of effective communication?
  - Clarity in language

- b) Listen poorly  
c) Home communication skills  
d) Adequate medium
8. The word communication is derived from \_\_\_\_\_  
a) communicare  
b) comunnicare  
c) comunicare  
d) communnicare
9. Which of these should communication not advance?  
a) Information  
b) Affinity  
c) Reality  
d) Personal desires
10. Which of these is a type of informal communication?  
a) Reports  
b) Orders  
c) Instructions  
d) Grapevine
11. Which of these involves the passing of information through a long line of people?  
a) Cluster  
b) Single strand  
c) Gossip  
d) Probability
12. Which of these is not a type of effective listening?  
a) Discriminative listening  
b) Evaluative listening  
c) Irritated listening  
d) Appreciative listening
13. Which of these should be avoided for effective listening?  
a) Patience  
b) Politeness  
c) Talking  
d) Attentiveness
14. Which of these is the greatest means of conveying information?  
a) Writing  
b) Words  
c) Signs  
d) Pictures
15. Which of these is not an element of non-verbal communication?  
a) Personal appearance  
b) Posture  
c) Eye contact  
d) Name of the speaker
16. Words must not be uttered with \_\_\_\_\_  
a) rudeness  
b) compassion  
c) respect  
d) politeness
17. When should the discussion in a conversation stop?  
a) When it turns into an argument  
b) When it is boring

**VENUE**  
Lecture Hall-III

**MNR Medical College**  
Fasalwadi, Sangareddy, Hyderabad  
Telangana-502 294  
INDIA

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

## A ONE WEEK CERTIFICATE PROGRAM ON COVID - 19

### FINAL ASSESSMENT TEST

NAME:

YEAR / SEM:

REG.NO:

DATE:

TIME: 30 Minutes

MARKS: 30

#### Tick the Correct Answer

1. Which of the following country has the highest number of confirmed death cases from the virus?  
a. China  
b. Brazil  
c. USA  
 d. Italy
2. When was the first case of the COVID-19 (coronavirus disease-19) infection reported in the USA? Select from the options below  
a. 2003  
b. 2013  
 c. 2019  
d. 2020
3. Which of the following virus may not show flu-like symptoms in humans?  
 a. Coronavirus  
b. Rhinovirus  
c. Rotavirus  
d. Influenza virus
4. Which of the following statement is incorrect about the important characteristics/properties of Coronavirus?  
a. Non-Enveloped RNA virus  
b. Enveloped RNA virus  
c. Distributed around the world  
d. Transmitted from person to person
5. Coronavirus can cause gastroenteritis in animals. True or False?  
a. True  
b. False
6. Which of the following group of people have a high risk of mortality in the COVID-19 infections?  
a. Pregnant women  
b. Kids 5-10 years old  
c. Men 30- 50 years old  
 d. All the above

7. Which of the following preventive measure is found to be less effective in reducing the transmission of the virus from one person to the other?
  - a. Quarantine of the infected person
  - b. Travel restriction to the epidemic area
  - c. Proper laboratory clothing with mask, gloves, and goggles by a health care worker
  - d. Getting a seasonal flu vaccination shot
8. SARS-CoV-2 Delta variant was first reported and identified in which of the following country?
  - a. UK
  - b. India
  - c. Italy
  - d. Pakistan
9. The middle east respiratory syndrome (MERS) is a type of coronavirus, which of the following year the first case of the MERS virus was reported?
  - a. 2003
  - b. 2020
  - c. 2012
  - d. 2019
10. The most likely source of the MERS-CoV to humans is.....?
  - a. Dogs
  - b. Fishes
  - c. Camels
  - d. Birds
11. All of the following are the common symptoms caused by the COVID-19 infection, Except?
  - a. High fever and chills
  - b. Cough
  - c. Difficulty in breathing
  - d. Brown spots around the face
12. Which of the following is NOT the proper specimen for the diagnosis of SARS-CoV?
  - a. Nasal secretions
  - b. Urine
  - c. Blood
  - d. Stool
13. Which of the following country had the highest cases of COVID-19 infections other than the USA and Brazil in the year 2020?
  - a. India
  - b. Italy
  - c. Mexico
  - d. Spain
14. New York had the highest number of deaths reported in the USA from COVID-19 during the initial pandemic period, approximately how many people all over the country had been reported to be infected in the year 2020?
  - a. 10 million
  - b. < 15 million
  - c. > 15 million
  - d. 15 million
15. Which of the following drug has been used for the treatment of COVID-19?
  - a. Peramivir
  - b. Acyclovir

Chairperson  
Internal Quality Assurance Cell (IQAC)  
MNR Medical College & Hospital

PRINCIPAL  
MNR MEDICAL COLLEGE & HOSPITAL,  
FASALWADI, SANGAREDDY-502294

- c. Remdesivir  
d. Tamiflu
16. According to the Center for Disease Control and Prevention (CDC), USA, more than 70% of the people dying from COVID-19 in 2020 were in which of the following age group?
    - a. 50 years and below
    - b. 65 years and above
    - c. 45 years and above
    - d. 50 years and above
  17. In 2020 more than 80 million people were found to be COVID-19 positive worldwide, how many confirmed death cases were reported globally?
    - a. 3 million
    - b. < 200,000
    - c. < 100,000
    - d. < 1.5 million
  18. Which of the following disease was the recent pandemic disease seen in the last 25 years?
    - a. 2009 H1N1
    - b. 2014 H5
    - c. 1994 Plague
    - d. None of the above
  19. Which of the following animal has been found to be the possible host for the COVID-19 that was transmitted to humans in China during late 2019?
    - a. Ducks
    - b. Rats
    - c. Cows
    - d. None of the above
  20. .... alcohol is found to be the most effective disinfectant for the COVID-19 virus
    - a. 50 % - 60 %
    - b. Methyl
    - c. 60% -70 %
    - d. 40% - 50%
  21. What preventive measures are recommended or required for the symptomatic as well as asymptomatic individuals that may help reduce or stop the spread of the virus?  
Select the correct answers:
    - a. Use of a mask to cover the mouth and nose outside of the house
    - b. Washing hands with soap and warm water for at least 20 seconds
    - c. Maintaining the distance of 6 feet from other people in public places
    - d. All of the above
  22. The study on coronavirus has shown that the virus remains active outside the host cell and enters the respiratory tract through the mucous membranes, the virus shows sensitivity to all of the following agents, EXCEPT?
    - a. UV light
    - b. Hot water
    - c. Sunlight
    - d. Low temperature
  23. The infected children had the symptoms of "pediatric multi-system inflammatory syndrome", experts suggest that the symptoms likely resemble which of the following condition?
    - a. Influenza
    - b. Kawasaki disease

  
**Chairperson**  
 Internal Quality Assurance Cell (IQAC)  
 MNR Medical College & Hospi

  
 MNR MEDICAL COLLEGE & HOSPITAL  
 FASALWADI, SANGAREDDY-502204

- c. Marasmus disease  
d. Toxic shock syndrome
24. In May 2020 Food and drug administration (FDA) gave approval to the pharmaceutical companies in the USA to further continue the phase 2 trials of a potential vaccine COVID-19. Phase 2 trials are assessed to observe the efficacy of the vaccine. Which of the following is the most correct statement about the phase II trial of the vaccines?
- Few number volunteers who are at risk are given the determined doses of the drug
  - Few groups of individuals are given a very small dose of the new drug
  - Small groups of volunteers are given multiple doses of the drug
  - The efficiency and safety of the drug after it is available in the market is tested
25. A 21-year-old male, working in a grocery store in California during the COVID-19 pandemic, developed a high fever, fatigue, and body ache similar to the symptoms of regular flu/common cold. He was suspected of COVID-19 by his doctor, since he had mild symptoms the doctor recommended him to stay in isolation at home and asked only to visit the hospital if the symptoms get worse, such as difficulty in breathing. All of the following statements are true about the diagnosis process of the COVID-19, EXCEPT?
- Nasal swab, throat swab, and saliva can be taken as a sample for the detection of the virus
  - The samples taken immediately after the exposure to the virus may give false-negative test results
  - A blood test is only the primary diagnostic test for the identification of the virus
  - RT-PCR technique is used as a diagnostic test for the identification of the virus
26. All of the following are the personal protective equipment (PPE) a health care provider should wear when handling and testing both confirmed or suspected COVID-19 patients. Select all the correct answers:
- Gloves
  - N95 mask
  - Eye protector
  - All of the above
27. The use of masks has been proven to be one of the essential preventive measures for flu virus. All of the following mask-wearing practices can be helpful to reduce or stop the spread of COVID-19 infection, Except?
- Respirator masks and N95 masks are effective for health care workers
  - It should not be worn loosely and should cover your mouth, chin, and nose
  - Person tested negative for COVID-19 may not require mask in grocery stores
  - Holding and touching the mask straps is the most safe and effective while wearing or removing the mask.
28. .... COVID-19 vaccine was approved by the CDC in the USA in April 2020, it has been found to be less effective and has shown severe side effects among some women since the first dose of the vaccine was given.
- Astrazeneca
  - J&J/Janssen
  - Moderna
  - Pfizer-BioNTech
29. Which of the following is a false statement regarding one of the first approved vaccines for COVID-19 by the FDA?
- The single dose of vaccine is sufficient
  - The vaccine dose has been authorized for ages 12 and older

- c. Mild to moderate side effects are common  
d. It is an mRNA type of a vaccine
30. Which of the following country was the first to authorize the Pfizer-BioNTech COVID-19 vaccine in 2020?
- a. USA  
b. Russia  
c. China  
d. UK

24. In May 2020 Food and drug administration (FDA) gave approval to the pharmaceutical companies in the USA to further continue the phase 2 trials of a potential vaccine COVID-19. Phase 2 trials are assessed to observe the efficacy of the vaccine.  
**Which of the following is the most correct statement about the phase II trial of the vaccines?**
- a. Few number volunteers who are at risk are given the determined doses of the drug  
b. Few groups of individuals are given a very small dose of the new drug  
c. Small groups of volunteers are given multiple doses of the drug  
**d. The efficiency and safety of the drug after it is available in the market is tested**
25. A 21-year-old male, working in a grocery store in California during the COVID-19 pandemic, developed a high fever, fatigue, and body ache similar to the symptoms of regular flu/common cold.  
He was suspected of COVID-19 by his doctor, since he had mild symptoms the doctor recommended him to stay in isolation at home and asked only to visit the hospital if the symptoms get worse, such as difficulty in breathing.  
**All of the following statements are true about the diagnosis process of the COVID-19, EXCEPT?**
- a. Nasal swab, throat swab, and saliva can be taken as a sample for the detection of the virus  
b. The samples taken immediately after the exposure to the virus may give false-negative test results  
**c. A blood test is only the primary diagnostic test for the identification of the virus**  
d. RT-PCR technique is used as a diagnostic test for the identification of the virus
26. All of the following are the personal protective equipment (PPE) a health care provider should wear when handling and testing both confirmed or suspected COVID-19 patients.  
**Select all the correct answers:**
- a. Gloves  
b. N95 mask  
c. Eye protector  
**d. All of the above**
27. The use of masks has been proven to be one of the essential preventive measures for flu virus. All of the following mask-wearing practices can be helpful to reduce or stop the spread of COVID-19 infection, **Except?**
- a. Respirator masks and N95 masks are effective for health care workers  
b. It should not be worn loosely and should cover your mouth, chin, and nose  
**c. Person tested negative for COVID-19 may not require mask in grocery stores**  
d. Holding and touching the mask straps is the most safe and effective while wearing or removing the mask.
28. .... COVID-19 vaccine was approved by the CDC in the USA in April 2020, it has been found to be less effective and has shown severe side effects among some women since the first dose of the vaccine was given.
- a. Astrazeneca  
**b. J&J/Janssen**  
c. Moderna  
d. Pfizer-BioNTech
29. Which of the following is a false statement regarding one of the first approved vaccines for COVID-19 by the FDA?
- a. The single dose of vaccine is sufficient**  
b. The vaccine dose has been authorized for ages 12 and older

- c. Mild to moderate side effects are common  
d. It is an mRNA type of a vaccine
30. Which of the following country was the first to authorize the Pfizer-BioNTech COVID-19 vaccine in 2020?
- a. USA
  - b. Russia
  - c. China
  - d. UK

### About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

Shand  
Internal  
MNR M

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

## A ONE WEEK CERTIFICATE PROGRAM ON COVID - 19

### FINAL ASSESSMENT TEST

NAME:

REG.NO:

TIME: 30 Minutes

YEAR / SEM:

DATE:

MARKS: 30

#### Tick the Correct Answer

1. Which of the following country has the highest number of confirmed death cases from the virus?  
a. China  
b. Brazil  
c. **USA**  
d. Italy
2. When was the first case of the COVID-19 (coronavirus disease-19) infection reported in the USA? Select from the options below  
a. 2003  
b. 2013  
c. 2019  
d. **2020**
3. Which of the following virus may not show flu-like symptoms in humans?  
a. Coronavirus  
b. Rhinovirus  
c. **Rotavirus**  
d. Influenza virus
4. Which of the following statement is incorrect about the important characteristics/properties of Coronavirus?  
a. **Non-Enveloped RNA virus**  
b. Enveloped RNA virus  
c. Distributed around the world  
d. Transmitted from person to person
5. Coronavirus can cause gastroenteritis in animals. True or False?  
a. **True**  
b. False
6. Which of the following group of people have a high risk of mortality in the COVID-19 infections?  
a. Pregnant women  
b. Kids 5-10 years old  
c. Men 30- 50 years old  
d. **All the above**

  
Chairperson  
Internal Quality Assurance Cell (IQAC)  
MNR Medical College & Hospital

  
**PRINCIPAL**  
MNR MEDICAL COLLEGE & HOSPITAL  
FASALWADI, SANGAREDDY-502294

7. Which of the following preventive measure is found to be less effective in reducing the transmission of the virus from one person to the other?
- Quarantine of the infected person
  - Travel restriction to the epidemic area
  - Proper laboratory clothing with mask, gloves, and goggles by a health care worker
  - Getting a seasonal flu vaccination shot**
8. SARS-CoV-2 Delta variant was first reported and identified in which of the following country?
- UK
  - India**
  - Italy
  - Pakistan
9. The middle east respiratory syndrome (MERS) is a type of coronavirus, which of the following year the first case of the MERS virus was reported?
- 2003
  - 2020
  - 2012**
  - 2019
10. The most likely source of the MERS-CoV to humans is.....?
- Dogs
  - Fishes
  - Camels**
  - Birds
11. All of the following are the common symptoms caused by the COVID-19 infection, **Except**?
- High fever and chills
  - Cough
  - Difficulty in breathing
  - Brown spots around the face**
12. Which of the following is NOT the proper specimen for the diagnosis of SARS-CoV?
- Nasal secretions
  - Urine**
  - Blood
  - Stool
13. Which of the following country had the highest cases of COVID-19 infections other than the USA and Brazil in the year 2020?
- India**
  - Italy
  - Mexico
  - Spain
14. New York had the highest number of deaths reported in the USA from COVID-19 during the initial pandemic period, approximately how many people all over the country had been reported to be infected in the year 2020?
- 10 million
  - < 15 million**
  - > 15 million
  - 15 million
15. Which of the following drug has been used for the treatment of COVID-19?
- Peramivir
  - Acyclovir

  
Chairperson  
Internal Quality Assurance Cell (IQAC)  
MNR Medical College & Hospital

  
PRINCIPAL  
MNR MEDICAL COLLEGE & HOSPITAL  
FASALWADI, SANGAREDDY-502294

- c. Remdesivir  
d. Tamiflu
16. According to the Center for Disease Control and Prevention (CDC), USA, more than 70% of the people dying from COVID-19 in 2020 were in which of the following age group?  
a. 50 years and below  
**b. 65 years and above**  
c. 45 years and above  
d. 50 years and above
17. In 2020 more than 80 million people were found to be COVID-19 positive worldwide, how many confirmed death cases were reported globally?  
a. 3 million  
b. < 200,000  
c. < 100,000  
**d. < 1.5 million**
18. Which of the following disease was the recent pandemic disease seen in the last 25 years?  
**a. 2009 H1N1**  
b. 2014 H5  
c. 1994 Plague  
d. None of the above
19. Which of the following animal has been found to be the possible host for the COVID-19 that was transmitted to humans in China during late 2019?  
a. Ducks  
b. Rats  
c. Cows  
**d. None of the above**
20. .... alcohol is found to be the most effective disinfectant for the COVID-19 virus  
a. 50 % - 60 %  
b. Methyl  
**c. 60% -70 %**  
d. 40% - 50%
21. What preventive measures are recommended or required for the symptomatic as well as asymptomatic individuals that may help reduce or stop the spread of the virus?  
**Select the correct answers:**  
a. Use of a mask to cover the mouth and nose outside of the house  
b. Washing hands with soap and warm water for at least 20 seconds  
c. Maintaining the distance of 6 feet from other people in public places  
**d. All of the above**
22. The study on coronavirus has shown that the virus remains active outside the host cell and enters the respiratory tract through the mucous membranes, the virus shows sensitivity to all of the following agents, **EXCEPT?**  
a. UV light  
b. Hot water  
c. Sunlight  
**d. Low temperature**
23. The infected children had the symptoms of "pediatric multi-system inflammatory syndrome", experts suggest that the symptoms likely resemble which of the following condition?  
a. Influenza  
**b. Kawasaki disease**

  
Chairperson  
Internal Quality Assurance Cell (IQAC),  
MNR Medical College & Hospital

  
**PRINCIPAL**  
MNR MEDICAL COLLEGE & HOSPITAL  
FASALYADL SANGAREDDY-502294

- c. Marasmus disease  
d. Toxic shock syndrome
24. In May 2020 Food and drug administration (FDA) gave approval to the pharmaceutical companies in the USA to further continue the phase 2 trials of a potential vaccine COVID-19. Phase 2 trials are assessed to observe the efficacy of the vaccine.  
**Which of the following is the most correct statement about the phase II trial of the vaccines?**
- a. Few number volunteers who are at risk are given the determined doses of the drug  
b. Few groups of individuals are given a very small dose of the new drug  
c. Small groups of volunteers are given multiple doses of the drug  
**d. The efficiency and safety of the drug after it is available in the market is tested**
25. A 21-year-old male, working in a grocery store in California during the COVID-19 pandemic, developed a high fever, fatigue, and body ache similar to the symptoms of regular flu/common cold.  
He was suspected of COVID-19 by his doctor, since he had mild symptoms the doctor recommended him to stay in isolation at home and asked only to visit the hospital if the symptoms get worse, such as difficulty in breathing.  
**All of the following statements are true about the diagnosis process of the COVID-19, EXCEPT?**
- a. Nasal swab, throat swab, and saliva can be taken as a sample for the detection of the virus  
b. The samples taken immediately after the exposure to the virus may give false-negative test results  
**c. A blood test is only the primary diagnostic test for the identification of the virus**  
d. RT-PCR technique is used as a diagnostic test for the identification of the virus
26. All of the following are the personal protective equipment (PPE) a health care provider should wear when handling and testing both confirmed or suspected COVID-19 patients.  
**Select all the correct answers:**
- a. Gloves  
b. N95 mask  
c. Eye protector  
**d. All of the above**
27. The use of masks has been proven to be one of the essential preventive measures for flu virus. All of the following mask-wearing practices can be helpful to reduce or stop the spread of COVID-19 infection, **Except?**
- a. Respirator masks and N95 masks are effective for health care workers  
b. It should not be worn loosely and should cover your mouth, chin, and nose  
**c. Person tested negative for COVID-19 may not require mask in grocery stores**  
d. Holding and touching the mask straps is the most safe and effective while wearing or removing the mask.
28. .... COVID-19 vaccine was approved by the CDC in the USA in April 2020, it has been found to be less effective and has shown severe side effects among some women since the first dose of the vaccine was given.
- a. Astrazeneca  
**b. J&J/Janssen**  
c. Moderna  
d. Pfizer-BioNTech
29. Which of the following is a false statement regarding one of the first approved vaccines for COVID-19 by the FDA?
- a. The single dose of vaccine is sufficient**  
b. The vaccine dose has been authorized for ages 12 and older
