About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

A ONE WEEK CERTIFICATE PROGRAM ON COVID - 19

FINAL ASSESSMENT TEST

NAME:

YEAR / SEM:

REG.NO:

DATE:

TIME: 30 Minutes

MARKS: 30

Tick the Correct Answer

1. Which of the following country has the highest number of confirmed death cases from the virus?
 - a. China
 - b. Brazil
 - c. USA**
 - d. Italy
2. When was the first case of the COVID-19 (coronavirus disease-19) infection reported in the USA? Select from the options below
 - a. 2003
 - b. 2013
 - c. 2019
 - d. 2020**
3. Which of the following virus may not show flu-like symptoms in humans?
 - a. Coronavirus
 - b. Rhinovirus
 - c. Rotavirus**
 - d. Influenza virus
4. Which of the following statement is incorrect about the important characteristics/properties of Coronavirus?
 - a. Non-Enveloped RNA virus**
 - b. Enveloped RNA virus
 - c. Distributed around the world
 - d. Transmitted from person to person
5. Coronavirus can cause gastroenteritis in animals. True or False?
 - a. True**
 - b. False
6. Which of the following group of people have a high risk of mortality in the COVID-19 infections?
 - a. Pregnant women
 - b. Kids 5-10 years old
 - c. Men 30- 50 years old
 - d. All the above**

7. Which of the following preventive measure is found to be less effective in reducing the transmission of the virus from one person to the other?
- Quarantine of the infected person
 - Travel restriction to the epidemic area
 - Proper laboratory clothing with mask, gloves, and goggles by a health care worker
 - Getting a seasonal flu vaccination shot**
8. SARS-CoV-2 Delta variant was first reported and identified in which of the following country?
- UK
 - India**
 - Italy
 - Pakistan
9. The middle east respiratory syndrome (MERS) is a type of coronavirus, which of the following year the first case of the MERS virus was reported?
- 2003
 - 2020
 - 2012**
 - 2019
10. The most likely source of the MERS-CoV to humans is.....?
- Dogs
 - Fishes
 - Camels**
 - Birds
11. All of the following are the common symptoms caused by the COVID-19 infection, **Except?**
- High fever and chills
 - Cough
 - Difficulty in breathing
 - Brown spots around the face**
12. Which of the following is NOT the proper specimen for the diagnosis of SARS-CoV?
- Nasal secretions
 - Urine**
 - Blood
 - Stool
13. Which of the following country had the highest cases of COVID-19 infections other than the USA and Brazil in the year 2020?
- India**
 - Italy
 - Mexico
 - Spain
14. New York had the highest number of deaths reported in the USA from COVID-19 during the initial pandemic period, approximately how many people all over the country had been reported to be infected in the year 2020?
- 10 million
 - < 15 million**
 - > 15 million
 - 15 million
15. Which of the following drug has been used for the treatment of COVID-19?
- Peramivir
 - Acyclovir

Chairperson
Internal Quality Assurance Cell (IQAC)
MNR Medical College & Hospital

PRINCIPAL
MNR MEDICAL COLLEGE & HOSPITAL
SASALWADI, SANGAREDDY-502294

- c. Remdesivir
d. Tamiflu
16. According to the Center for Disease Control and Prevention (CDC), USA, more than 70% of the people dying from COVID-19 in 2020 were in which of the following age group?
a. 50 years and below
b. 65 years and above
c. 45 years and above
d. 50 years and above
17. In 2020 more than 80 million people were found to be COVID-19 positive worldwide, how many confirmed death cases were reported globally?
a. 3 million
b. < 200,000
c. < 100,000
d. < 1.5 million
18. Which of the following disease was the recent pandemic disease seen in the last 25 years?
a. 2009 H1N1
b. 2014 H5
c. 1994 Plague
d. None of the above
19. Which of the following animal has been found to be the possible host for the COVID-19 that was transmitted to humans in China during late 2019?
a. Ducks
b. Rats
c. Cows
d. None of the above
20. alcohol is found to be the most effective disinfectant for the COVID-19 virus
a. 50 % - 60 %
b. Methyl
c. 60% - 70 %
d. 40% - 50%
21. What preventive measures are recommended or required for the symptomatic as well as asymptomatic individuals that may help reduce or stop the spread of the virus?
Select the correct answers:
a. Use of a mask to cover the mouth and nose outside of the house
b. Washing hands with soap and warm water for at least 20 seconds
c. Maintaining the distance of 6 feet from other people in public places
d. All of the above
22. The study on coronavirus has shown that the virus remains active outside the host cell and enters the respiratory tract through the mucous membranes, the virus shows sensitivity to all of the following agents, **EXCEPT?**
a. UV light
b. Hot water
c. Sunlight
d. Low temperature
23. The infected children had the symptoms of "pediatric multi-system inflammatory syndrome", experts suggest that the symptoms likely resemble which of the following condition?
a. Influenza
b. Kawasaki disease

Chairperson
Internal Quality Assurance Cell (IQAC)
MNR Medical College & Hospital

PRINCIPAL
MNR MEDICAL COLLEGE & HOSPITAL
FASALWADI, SANGAREDDY-502299

- c. Marasmus disease
 d. Toxic shock syndrome
24. In May 2020 Food and drug administration (FDA) gave approval to the pharmaceutical companies in the USA to further continue the phase 2 trials of a potential vaccine COVID-19. Phase 2 trials are assessed to observe the efficacy of the vaccine.
Which of the following is the most correct statement about the phase II trial of the vaccines?
- a. Few number volunteers who are at risk are given the determined doses of the drug
 b. Few groups of individuals are given a very small dose of the new drug
 c. Small groups of volunteers are given multiple doses of the drug
d. The efficiency and safety of the drug after it is available in the market is tested
25. A 21-year-old male, working in a grocery store in California during the COVID-19 pandemic, developed a high fever, fatigue, and body ache similar to the symptoms of regular flu/common cold.
 He was suspected of COVID-19 by his doctor, since he had mild symptoms the doctor recommended him to stay in isolation at home and asked only to visit the hospital if the symptoms get worse, such as difficulty in breathing.
All of the following statements are true about the diagnosis process of the COVID-19, EXCEPT?
- a. Nasal swab, throat swab, and saliva can be taken as a sample for the detection of the virus
 b. The samples taken immediately after the exposure to the virus may give false-negative test results
c. A blood test is only the primary diagnostic test for the identification of the virus
 d. RT-PCR technique is used as a diagnostic test for the identification of the virus
26. All of the following are the personal protective equipment (PPE) a health care provider should wear when handling and testing both confirmed or suspected COVID-19 patients.
Select all the correct answers:
- a. Gloves
 b. N95 mask
 c. Eye protector
d. All of the above
27. The use of masks has been proven to be one of the essential preventive measures for flu virus. All of the following mask-wearing practices can be helpful to reduce or stop the spread of COVID-19 infection, **Except?**
- a. Respirator masks and N95 masks are effective for health care workers
 b. It should not be worn loosely and should cover your mouth, chin, and nose
c. Person tested negative for COVID-19 may not require mask in grocery stores
 d. Holding and touching the mask straps is the most safe and effective while wearing or removing the mask.
28. COVID-19 vaccine was approved by the CDC in the USA in April 2020, it has been found to be less effective and has shown severe side effects among some women since the first dose of the vaccine was given.
- a. Astrazeneca
b. J&J/Janssen
 c. Moderna
 d. Pfizer-BioNTech
29. Which of the following is a false statement regarding one of the first approved vaccines for COVID-19 by the FDA?
- a. The single dose of vaccine is sufficient**
 b. The vaccine dose has been authorized for ages 12 and older

 21. What preventive measures are recommended or required for the symptomatic as well as asymptomatic individuals that may help reduce or stop the spread of the virus?

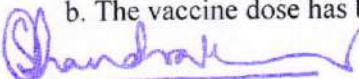

Select the correct answers:

 - a. Use of a mask to cover the mouth and nose outside of the house
 - b. Washing hands with soap and warm water for at least 20 seconds
 - c. Maintaining the distance of 6 feet from other people in public places
 - d. All of the above**
 22. The study on coronavirus has shown that the virus remains active outside the host cell and enters the respiratory tract through the mucous membranes, the virus shows sensitivity to all of the following agents, **EXCEPT?**
 - a. UV light
 - b. Hot water
 - c. Sunlight
 - d. Low temperature**
 23. The infected children had the symptoms of "pediatric multi-system inflammatory syndrome", experts suggest that the symptoms likely resemble which of the following condition?
 - a. Influenza
 - b. Kawasaki disease**

- c. Marasmus disease
d. Toxic shock syndrome
24. In May 2020 Food and drug administration (FDA) gave approval to the pharmaceutical companies in the USA to further continue the phase 2 trials of a potential vaccine COVID-19. Phase 2 trials are assessed to observe the efficacy of the vaccine.
Which of the following is the most correct statement about the phase II trial of the vaccines?
- a. Few number volunteers who are at risk are given the determined doses of the drug
b. Few groups of individuals are given a very small dose of the new drug
c. Small groups of volunteers are given multiple doses of the drug
d. The efficiency and safety of the drug after it is available in the market is tested
25. A 21-year-old male, working in a grocery store in California during the COVID-19 pandemic, developed a high fever, fatigue, and body ache similar to the symptoms of regular flu/common cold.
He was suspected of COVID-19 by his doctor, since he had mild symptoms the doctor recommended him to stay in isolation at home and asked only to visit the hospital if the symptoms get worse, such as difficulty in breathing.
All of the following statements are true about the diagnosis process of the COVID-19, EXCEPT?
- a. Nasal swab, throat swab, and saliva can be taken as a sample for the detection of the virus
b. The samples taken immediately after the exposure to the virus may give false-negative test results
c. A blood test is only the primary diagnostic test for the identification of the virus
d. RT-PCR technique is used as a diagnostic test for the identification of the virus
26. All of the following are the personal protective equipment (PPE) a health care provider should wear when handling and testing both confirmed or suspected COVID-19 patients.
Select all the correct answers:
- a. Gloves
b. N95 mask
c. Eye protector
d. All of the above
27. The use of masks has been proven to be one of the essential preventive measures for flu virus. All of the following mask-wearing practices can be helpful to reduce or stop the spread of COVID-19 infection, **Except?**
- a. Respirator masks and N95 masks are effective for health care workers
b. It should not be worn loosely and should cover your mouth, chin, and nose
c. Person tested negative for COVID-19 may not require mask in grocery stores
d. Holding and touching the mask straps is the most safe and effective while wearing or removing the mask.
28. COVID-19 vaccine was approved by the CDC in the USA in April 2020, it has been found to be less effective and has shown severe side effects among some women since the first dose of the vaccine was given.
- a. Astrazeneca
b. J&J/Janssen
c. Moderna
d. Pfizer-BioNTech
29. Which of the following is a false statement regarding one of the first approved vaccines for COVID-19 by the FDA?
- a. The single dose of vaccine is sufficient**
b. The vaccine dose has been authorized for ages 12 and older

Objectives of the Programme:

- The aim of basic life support includes preserving life, preventing injury from getting worse, aiding recovery, relieving pain, and protecting the unconscious. The main objective is to save lives.
- The major objective of BLS is to provide oxygen to the heart and the brain and to sustain tissue viability until definitive electrical or medical treatment.
- Basic Life Support (BLS) course provides healthcare providers and public safety profession-als the knowledge and skills necessary to respond to breathing and cardiac emergencies in adult, child and infant patients.

Topics to be Covered

- Introduction, Basic Concepts.
- CPR (Cardiopulmonary resuscitation) in adults.
- CPR (Cardiopulmonary resuscitation) in children, Pediatrics and Infants.
- Cardiac Arrest.
- AED (Automated external defibrillator) for adults and infants.

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

A ONE WEEK CERTIFICATE PROGRAM ON BASIC LIFE SUPPORT

FINAL ASSESSMENT TEST

NAME:

YEAR / SEM:

REG.NO:

DATE:

TIME: 30 Minutes

MARKS: 30

Tick the Correct Answer

1. What is the compression to breath ratio in two-person CPR for an adult?
 - a) 20:2
 - b) 30:2
 - c) 15:2
 - d) 25:2
2. How often should rescuers switch roles when performing two-rescuer adult CPR?
 - a) After every cycle of CPR
 - b) After every two cycles of CPR
 - c) After every five cycles of CPR
 - d) After every 10 cycles of CPR
3. Where should you attempt to perform a pulse check in a child who is anywhere from one year to puberty?
 - a) Brachial artery
 - b) Ulnar artery
 - c) Temporal artery
 - d) Carotid
4. You are performing CPR on an adult victim. The second rescuer has arrived with the AED and turned it on. What is their next step?
 - a) Place the pads over the victim's clothes
 - b) Wait for advanced care to arrive before continuing use of the AED
 - c) Place the pads on the victim's bare chest
 - d) Shock the victim

Chairperson
Internal Quality Assurance Cell (IQAC)
MNR Medical College & Hospital

PRINCIPAL
MNR MEDICAL COLLEGE & HOSPITAL
FASALWADI, SANGAREDDY-502294

5. Rescue Breathing is used for a victim who is unconscious but has a pulse. What is the correct rate for rescue breathing in a child or infant?
- 1 breath every 5 to 6 seconds
 - 2 breaths every 3 to 5 seconds
 - 1 breath every 3 to 5 seconds
 - 2 breaths every 5 to 6 seconds
6. What is the correct hand placement for compressions on an infant victim?
- Use 2 hands when performing compressions on an infant
 - Use two fingers when performing compressions on an infant
 - Use one hand when performing compressions on an infant
 - Do not give compressions on an infant
7. You are alone and find a potential victim. What is your first step?
- Begin Chest Compressions
 - Ensure scene safety
 - Check for responsiveness
 - Open the airway and give 2 breaths
8. What is the correct rate of compressions?
- 100
 - 40
 - 80
 - 60
9. During CPR on an adult victim, the compression-to-breath ratio is:
- Give 1 breath after every 5 compressions
 - Give 2 breaths after every 30 compressions
 - Give 3 Breaths after every 15 compressions
 - Give 2 breaths after every 100 compressions
10. When should you use the two thumb-encircling hands technique on an infant?
- When there are 2 rescuers present for CPR
 - When your fingers get tired of compressions
 - When you want to produce less blood flow in the infant
 - When you are trying to relieve choking in the infant

Chairperson
Internal Quality Assurance Cell (IQAC)
MNR Medical College & Hospital

MNR MEDICAL COLLEGE & HOSPITAL
FASALWADI, SANGAREDDY-502234

11. You have noticed a potential victim and ensured the scene is safe. What is your next step?
- a) Provide rescue breathing
 - b) Check for victim's responsiveness
 - c) Begin chest compressions
 - d) Call the victim's doctor
12. Use abdominal thrusts to relieve choking in a conscious adult. State true or false.
- a) True
 - b) False
13. You are giving CPR to a 5-year-old child. A second rescuer comes by and states they know CPR. What happens to your Compression to Breath ratio when you add the second rescuer?
- a) It changes - 15 compressions to 2 breaths
 - b) It changes - 30 compressions to 3 breaths
 - c) It changes - 5 compressions to 1 breath
 - d) It stays the same - 30 compressions to 2 breaths
14. After the AED has delivered the shock you should...
- a) Continue CPR beginning with compressions
 - b) Wait patiently for the AED to reanalyze
 - c) Give 2 breaths
 - d) Turn off the AED
15. The 2015 AHA guidelines for CPR recommended BLS sequence of steps are:
- a) Chest compressions, Airway, Breathing
 - b) None of the above
 - c) Airway, Breathing, Check pulse
 - d) Airway, Breathing, Chest compressions
16. The pulse assessed in an adult cardiac arrest victim is called the _____ pulse?
- a) Groin
 - b) Radial
 - c) Carotid
 - d) Tempora

Chairperson
Internal Quality Assurance Cell (IQAC)
MNR Medical College & Hospital

PRINCIPAL
MNR MEDICAL COLLEGE & HOSPITAL
FASALWADI, SANGAREDDY-502294

17. You find an unresponsive victim without a pulse. You do not have a mask. What is the next step for an untrained lay responder?
- a) Go call 911
 - b) Wait until EMS arrives
 - c) Begin CPR and perform mouth-to-mouth
 - d) Use your shirt over their mouth as a barrier
18. What is the correct compression-to-ventilation ratio for Two-Rescuer Infant BLS?
- a) 30:2
 - b) 30:1
 - c) 15:2
 - d) 15:1
19. You are treating an adult choking victim. They initially can cough, but now are grasping their throat and turning blue. What is the next step?
- a) Heimlich Maneuver
 - b) Begin CPR
 - c) Rescue breathing
 - d) Check pulse
20. The five steps in the Adult Chain of Survival include all of the following EXCEPT:*
- a) Early CPR
 - b) Rapid defibrillation
 - c) Advanced airway placement
 - d) Integrated post-cardiac arrest care
21. Which of the following are signs of airway obstruction?*
- a) Poor air exchange
 - b) High-pitched noise while inhaling
 - c) Inability to speak
 - d) All of the above
22. After delivering a shock with and AED, what is the next step in caring for a person?*
- a) Reassess for a pulse.
 - b) Do chest compressions only.
 - c) Resume CPR.
 - d) Do ventilation only.

23. Over what age should you use 'Adult' AED pads?
- a) 8 years old
 - b) 12 years old
 - c) 18 years old
 - d) 21 years old
24. Efforts to relieve choking should be stopped when:
- a) The obstruction is removed
 - b) The victim becomes unresponsive
 - c) The victim begins breathing normally
 - d) Any of the above occurs
25. In 2-rescuer CPR, where the patient is between 1 years old and puberty, the chest compression to breaths ratio is:
- a) 15:1
 - b) 15:2
 - c) 30:1
 - d) 30:2
26. CPR is initiated and the victim's pulse returns but he is not breathing. What ventilation rate should be used for this patient?
- a) 8 per minute
 - b) 12 per minute
 - c) 20 per minute
 - d) Depends on his color
27. What does AED stand for?
- a) Automatic Energy Delivery
 - b) Automated External Device
 - c) Automated External Defibrillator
 - d) Autonomous Energy Defibrillator
28. The 5 links in the adult Chain of Survival include all of the following EXCEPT:
- a) Early CPR
 - b) Rapid Defibrillation
 - c) Use of Cardiovascular Medications
 - d) Integrated Post-Cardiac Arrest Care

Chairperson

MNR Medical College & Hospital

PRINCIPAL
MNR MEDICAL COLLEGE & HOSPITAL
FASALWADI, SANGAREDDY-502296

29. When do you phone the emergency response number if you are alone with an unresponsive infant?
- a) after 5 cycles of CPR
 - b) after 1 cycle of CPR
 - c) immediately
 - d) after you give 2 breaths
30. Which of the following statements best describes the benefit of rescue breathing?
- a) Rescue breathing will help overcome any airway obstruction that may be blocking the airway
 - b) Rescue breathing will maintain completely normal oxygenation for the victim
 - c) Rescue breathing might defibrillate the heart
 - d) Rescue breathing is an effective way to provide oxygen to the victim

A ONE WEEK CERTIFICATE PROGRAM ON BASIC LIFE SUPPORT

FINAL ASSESSMENT TEST

NAME:

YEAR / SEM:

REG.NO:

DATE:

TIME: 30 Minutes

MARKS: 30

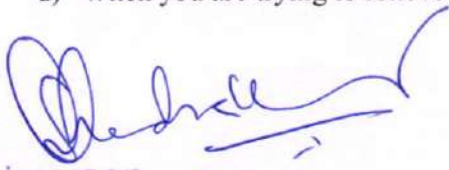

Tick the Correct Answer

1. What is the compression to breath ratio in two-person CPR for an adult?
 - a) 20:2
 - b) 30:2**
 - c) 15:2
 - d) 25:2
2. How often should rescuers switch roles when performing two-rescuer adult CPR?
 - a) After every cycle of CPR
 - b) After every two cycles of CPR**
 - c) After every five cycles of CPR
 - d) After every 10 cycles of CPR
3. Where should you attempt to perform a pulse check in a child who is anywhere from one year to puberty?
 - a) Brachial artery**
 - b) Ulnar artery
 - c) Temporal artery
 - d) Carotid
4. You are performing CPR on an adult victim. The second rescuer has arrived with the AED and turned it on. What is their next step?
 - a) Place the pads over the victim's clothes
 - b) Wait for advanced care to arrive before continuing use of the AED
 - c) Place the pads on the victim's bare chest**
 - d) Shock the victim

5. Rescue Breathing is used for a victim who is unconscious but has a pulse. What is the correct rate for rescue breathing in a child or infant?
- a) 1 breath every 5 to 6 seconds
 - b) 2 breaths every 3 to 5 seconds
 - c) 1 breath every 3 to 5 seconds**
 - d) 2 breaths every 5 to 6 seconds
6. What is the correct hand placement for compressions on an infant victim?
- a) Use 2 hands when performing compressions on an infant
 - b) Use two fingers when performing compressions on an infant**
 - c) Use one hand when performing compressions on an infant
 - d) Do not give compressions on an infant
7. You are alone and find a potential victim. What is your first step?
- a) Begin Chest Compressions
 - b) Ensure scene safety**
 - c) Check for responsiveness
 - d) Open the airway and give 2 breaths
8. What is the correct rate of compressions?
- a) 100**
 - b) 40
 - c) 80
 - d) 60
9. During CPR on an adult victim, the compression-to-breath ratio is:
- a) Give 1 breath after every 5 compressions
 - b) Give 2 breaths after every 30 compressions**
 - c) Give 3 Breaths after every 15 compressions
 - d) Give 2 breaths after every 100 compressions
10. When should you use the two thumb-encircling hands technique on an infant?
- a) When there are 2 rescuers present for CPR
 - b) When your fingers get tired of compressions
 - c) When you want to produce less blood flow in the infant
 - d) When you are trying to relieve choking in the infant

Chairperson
Internal Quality Assurance Cell (IQAC)
MNR Medical College & Hospital

FASALWADI, SANGAREDDY-502294

11. You have noticed a potential victim and ensured the scene is safe. What is your **next** step?
- Provide rescue breathing
 - Check for victim's responsiveness
 - Begin chest compressions
 - Call the victim's doctor
12. Use abdominal thrusts to relieve choking in a conscious adult. State true or false.
- True**
 - False
13. You are giving CPR to a 5-year-old child. A second rescuer comes by and states they know CPR. What happens to your Compression to Breath ratio when you add the second rescuer?
- It changes - 15 compressions to 2 breaths**
 - It changes - 30 compressions to 3 breaths
 - It changes - 5 compressions to 1 breath
 - It stays the same - 30 compressions to 2 breaths
14. After the AED has delivered the shock you should...
- Continue CPR beginning with compressions**
 - Wait patiently for the AED to reanalyze
 - Give 2 breaths
 - Turn off the AED
15. The 2015 AHA guidelines for CPR recommended BLS sequence of steps are:
- Chest compressions, Airway, Breathing
 - None of the above
 - Airway, Breathing, Check pulse
 - Airway, Breathing, Chest compressions**
16. The pulse assessed in an adult cardiac arrest victim is called the _____ pulse?
- Groin
 - Radial
 - Carotid**
 - Tempora

Chairperson

MNR Medical College & Hospital

PRINCIPAL
MNR MEDICAL COLLEGE & HOSPITAL
FASALWADI, SANGAREDDY-502294

17. You find an unresponsive victim without a pulse. You do not have a mask. What is the next step for an untrained lay responder?
- a) Go call 911
 - b) Wait until EMS arrives
 - c) Begin CPR and perform mouth-to-mouth**
 - d) Use your shirt over their mouth as a barrier
18. What is the correct compression-to-ventilation ratio for Two-Rescuer Infant BLS?
- a) 30:2
 - b) 30:1
 - c) 15:2**
 - d) 15:1
19. You are treating an adult choking victim. They initially can cough, but now are grasping their throat and turning blue. What is the next step?
- a) Heimlich Maneuver**
 - b) Begin CPR
 - c) Rescue breathing
 - d) Check pulse
20. The five steps in the Adult Chain of Survival include all of the following EXCEPT:*
- a) Early CPR
 - b) Rapid defibrillation
 - c) Advanced airway placement**
 - d) Integrated post-cardiac arrest care
21. Which of the following are signs of airway obstruction?*
- a) Poor air exchange
 - b) High-pitched noise while inhaling
 - c) Inability to speak
 - d) All of the above**
22. After delivering a shock with an AED, what is the next step in caring for a person?*
- a) Reassess for a pulse.
 - b) Do chest compressions only.
 - c) Resume CPR.**
 - d) Do ventilation only.

Date: 09.11.2020

PROGRAM REPORT

Name of the Event : A One week Certificate Program on "Basic Life Support"

Date : 02.11.2020 to 06.11.2020

Resource Person : Dr. Adam

Professor / Anesthesia,

Dr. Ramachander,

Professor & Head

MNR Medical College

Email ID: adam@gmail.com

Name of the Coordinator: Dr. Syed

Number of Students attended: 35

Venue: Lecture Hall

OBJECTIVE OF THE PROGRAM:

- The aim of basic life support includes preserving life, preventing injury from getting worse, aiding recovery, relieving pain, and protecting the unconscious. The main objective is to save lives.
- The major objective of BLS is to provide oxygen to the heart and the brain and to sustain tissue viability until definitive electrical or medical treatment.
- Basic Life Support (BLS) course provides healthcare providers and public safety professionals the knowledge and skills necessary to respond to breathing and cardiac emergencies in adult, child and infant patients.

TOPICS COVERED:

- Introduction, Basic Concepts.
- CPR (Cardiopulmonary resuscitation) in adults.
- CPR (Cardiopulmonary resuscitation) in Pediatrics and Infants.
- Cardiac Arrest.
- AED (Automated external defibrillator) for adults and infants.

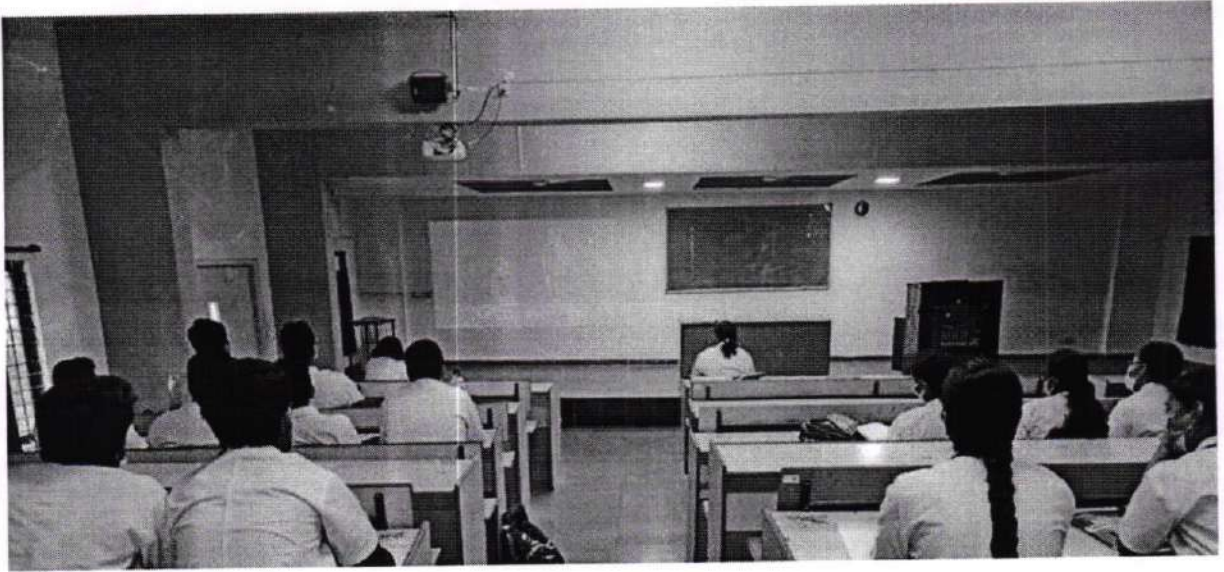

Chairperson

Internal Quality Assurance Cell (IQAC)
MNR Medical College & Hospital

PRINCIPAL

MNR MEDICAL COLLEGE & HOSPITAL
FASALWADI, SANGAREDDY-502294

- Foreign Body.

OUTCOME OF THE PROGRAM:

At the end of the program, the student will be able to

- Improve knowledge and skills related to basic life support practices in students. Periodic basic life support training is very important for competency in this area among students.
- Recognize an emergency situation. Identify, assess and minimize immediate hazards to self and others. Assess the casualty and recognize the need for CPR. Seek assistance from emergency services.

About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

Dr. [Signature]
Internal Quality Assurance Cell (IQAC)
MNR Medical College & Hospital

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

MARKS: 30

Tick the Correct Answer

1. Which of the following country has the highest number of confirmed death cases from the virus?
a. China
b. Brazil
c. **USA**
d. Italy
2. When was the first case of the COVID-19 (coronavirus disease-19) infection reported in the USA? Select from the options below
a. 2003
b. 2013
c. 2019
d. **2020**
3. Which of the following virus may not show flu-like symptoms in humans?
a. Coronavirus
b. Rhinovirus
c. **Rotavirus**
d. Influenza virus
4. Which of the following statement is incorrect about the important characteristics/properties of Coronavirus?
a. **Non-Enveloped RNA virus**
b. Enveloped RNA virus
c. Distributed around the world
d. Transmitted from person to person
5. Coronavirus can cause gastroenteritis in animals. True or False?
a. **True**
b. False
6. Which of the following group of people have a high risk of mortality in the COVID-19 infections?
a. Pregnant women
b. Kids 5-10 years old
c. Men 30- 50 years old
d. **All the above**

Chairperson

7. Which of the following preventive measure is found to be less effective in reducing the transmission of the virus from one person to the other?
- Quarantine of the infected person
 - Travel restriction to the epidemic area
 - Proper laboratory clothing with mask, gloves, and goggles by a health care worker
 - Getting a seasonal flu vaccination shot**
8. SARS-CoV-2 Delta variant was first reported and identified in which of the following country?
- UK
 - India**
 - Italy
 - Pakistan
9. The middle east respiratory syndrome (MERS) is a type of coronavirus, which of the following year the first case of the MERS virus was reported?
- 2003
 - 2020
 - 2012**
 - 2019
10. The most likely source of the MERS-CoV to humans is.....?
- Dogs
 - Fishes
 - Camels**
 - Birds
11. All of the following are the common symptoms caused by the COVID-19 infection, **Except**?
- High fever and chills
 - Cough
 - Difficulty in breathing
 - Brown spots around the face**
12. Which of the following is NOT the proper specimen for the diagnosis of SARS-CoV?
- Nasal secretions
 - Urine**
 - Blood
 - Stool
13. Which of the following country had the highest cases of COVID-19 infections other than the USA and Brazil in the year 2020?
- India**
 - Italy
 - Mexico
 - Spain
14. New York had the highest number of deaths reported in the USA from COVID-19 during the initial pandemic period, approximately how many people all over the country had been reported to be infected in the year 2020?
- 10 million
 - < 15 million**
 - > 15 million
 - 15 million
15. Which of the following drug has been used for the treatment of COVID-19?
- Peramivir
 - Acyclovir**

Chairperson
Internal Quality Assurance Cell (IQAC)
MNR Medical College & Hospital

PRINCIPAL
MNR MEDICAL COLLEGE & HOSPITAL
FASALWADI SANGAREDDY

- c. Remdesivir
d. Tamiflu
16. According to the Center for Disease Control and Prevention (CDC), USA, more than 70% of the people dying from COVID-19 in 2020 were in which of the following age group?
a. 50 years and below
b. 65 years and above
c. 45 years and above
d. 50 years and above
17. In 2020 more than 80 million people were found to be COVID-19 positive worldwide, how many confirmed death cases were reported globally?
a. 3 million
b. < 200,000
c. < 100,000
d. < 1.5 million
18. Which of the following disease was the recent pandemic disease seen in the last 25 years?
a. 2009 H1N1
b. 2014 H5
c. 1994 Plague
d. None of the above
19. Which of the following animal has been found to be the possible host for the COVID-19 that was transmitted to humans in China during late 2019?
a. Ducks
b. Rats
c. Cows
d. None of the above
20. alcohol is found to be the most effective disinfectant for the COVID-19 virus
a. 50 % - 60 %
b. Methyl
c. 60% -70 %
d. 40% - 50%
21. What preventive measures are recommended or required for the symptomatic as well as asymptomatic individuals that may help reduce or stop the spread of the virus?
Select the correct answers:
a. Use of a mask to cover the mouth and nose outside of the house
b. Washing hands with soap and warm water for at least 20 seconds
c. Maintaining the distance of 6 feet from other people in public places
d. All of the above
22. The study on coronavirus has shown that the virus remains active outside the host cell and enters the respiratory tract through the mucous membranes, the virus shows sensitivity to all of the following agents, **EXCEPT?**
a. UV light
b. Hot water
c. Sunlight
d. Low temperature
23. The infected children had the symptoms of "pediatric multi-system inflammatory syndrome", experts suggest that the symptoms likely resemble which of the following condition?
a. Influenza
b. Kawasaki disease

Chairperson
Internal Quality Assurance Cell (IQAC)
MNR Medical College & Hospital

PRINCIPAL
MNR MEDICAL COLLEGE & HOSPITAL

- c. Marasmus disease
d. Toxic shock syndrome
24. In May 2020 Food and drug administration (FDA) gave approval to the pharmaceutical companies in the USA to further continue the phase 2 trials of a potential vaccine COVID-19. Phase 2 trials are assessed to observe the efficacy of the vaccine.
Which of the following is the most correct statement about the phase II trial of the vaccines?
- a. Few number volunteers who are at risk are given the determined doses of the drug
b. Few groups of individuals are given a very small dose of the new drug
c. Small groups of volunteers are given multiple doses of the drug
d. The efficiency and safety of the drug after it is available in the market is tested
25. A 21-year-old male, working in a grocery store in California during the COVID-19 pandemic, developed a high fever, fatigue, and body ache similar to the symptoms of regular flu/common cold.
He was suspected of COVID-19 by his doctor, since he had mild symptoms the doctor recommended him to stay in isolation at home and asked only to visit the hospital if the symptoms get worse, such as difficulty in breathing.
All of the following statements are true about the diagnosis process of the COVID-19, EXCEPT?
- a. Nasal swab, throat swab, and saliva can be taken as a sample for the detection of the virus
b. The samples taken immediately after the exposure to the virus may give false-negative test results
c. A blood test is only the primary diagnostic test for the identification of the virus
d. RT-PCR technique is used as a diagnostic test for the identification of the virus
26. All of the following are the personal protective equipment (PPE) a health care provider should wear when handling and testing both confirmed or suspected COVID-19 patients.
Select all the correct answers:
- a. Gloves
b. N95 mask
c. Eye protector
d. All of the above
27. The use of masks has been proven to be one of the essential preventive measures for flu virus. All of the following mask-wearing practices can be helpful to reduce or stop the spread of COVID-19 infection, **Except?**
- a. Respirator masks and N95 masks are effective for health care workers
b. It should not be worn loosely and should cover your mouth, chin, and nose
c. Person tested negative for COVID-19 may not require mask in grocery stores
d. Holding and touching the mask straps is the most safe and effective while wearing or removing the mask.
28. COVID-19 vaccine was approved by the CDC in the USA in April 2020, it has been found to be less effective and has shown severe side effects among some women since the first dose of the vaccine was given.
- a. Astrazeneca
b. J&J/Janssen
c. Moderna
d. Pfizer-BioNTech
29. Which of the following is a false statement regarding one of the first approved vaccines for COVID-19 by the FDA?
- a. The single dose of vaccine is sufficient**
b. The vaccine dose has been authorized for ages 12 and older

 - a. China
 - b. Brazil
 - c. USA**
 - d. Italy
2. When was the first case of the COVID-19 (coronavirus disease-19) infection reported in the USA? Select from the options below
 - a. 2003
 - b. 2013
 - c. 2019
 - d. 2020**
3. Which of the following virus may not show flu-like symptoms in humans?
 - a. Coronavirus
 - b. Rhinovirus
 - c. Rotavirus**
 - d. Influenza virus
4. Which of the following statement is incorrect about the important characteristics/properties of Coronavirus?
 - a. Non-Enveloped RNA virus**
 - b. Enveloped RNA virus
 - c. Distributed around the world
 - d. Transmitted from person to person
5. Coronavirus can cause gastroenteritis in animals. True or False?
 - a. True**
 - b. False
6. Which of the following group of people have a high risk of mortality in the COVID-19 infections?
 - a. Pregnant women
 - b. Kids 5-10 years old
 - c. Men 30- 50 years old
 - d. All the above**

7. Which of the following preventive measure is found to be less effective in reducing the transmission of the virus from one person to the other?
 - a. Quarantine of the infected person
 - b. Travel restriction to the epidemic area
 - c. Proper laboratory clothing with mask, gloves, and goggles by a health care worker
 - d. Getting a seasonal flu vaccination shot**
8. SARS-CoV-2 Delta variant was first reported and identified in which of the following country?
 - a. UK
 - b. India**
 - c. Italy
 - d. Pakistan
9. The middle east respiratory syndrome (MERS) is a type of coronavirus, which of the following year the first case of the MERS virus was reported?
 - a. 2003
 - b. 2020
 - c. 2012**
 - d. 2019
10. The most likely source of the MERS-CoV to humans is.....?
 - a. Dogs
 - b. Fishes
 - c. Camels**
 - d. Birds
11. All of the following are the common symptoms caused by the COVID-19 infection, **Except?**
 - a. High fever and chills
 - b. Cough
 - c. Difficulty in breathing
 - d. Brown spots around the face**
12. Which of the following is NOT the proper specimen for the diagnosis of SARS-CoV?
 - a. Nasal secretions
 - b. Urine**
 - c. Blood
 - d. Stool
13. Which of the following country had the highest cases of COVID-19 infections other than the USA and Brazil in the year 2020?
 - a. India**
 - b. Italy
 - c. Mexico
 - d. Spain
14. New York had the highest number of deaths reported in the USA from COVID-19 during the initial pandemic period, approximately how many people all over the country had been reported to be infected in the year 2020?
 - a. 10 million
 - b. < 15 million**
 - c. > 15 million
 - d. 15 million
15. Which of the following drug has been used for the treatment of COVID-19?
 - a. Peramivir
 - b. Acyclovir**

Chairperson

- c. Remdesivir
d. Tamiflu
16. According to the Center for Disease Control and Prevention (CDC), USA, more than 70% of the people dying from COVID-19 in 2020 were in which of the following age group?
a. 50 years and below
b. 65 years and above
c. 45 years and above
d. 50 years and above
17. In 2020 more than 80 million people were found to be COVID-19 positive worldwide, how many confirmed death cases were reported globally?
a. 3 million
b. < 200,000
c. < 100,000
d. < 1.5 million
18. Which of the following disease was the recent pandemic disease seen in the last 25 years?
a. 2009 H1N1
b. 2014 H5
c. 1994 Plague
d. None of the above
19. Which of the following animal has been found to be the possible host for the COVID-19 that was transmitted to humans in China during late 2019?
a. Ducks
b. Rats
c. Cows
d. None of the above
20. alcohol is found to be the most effective disinfectant for the COVID-19 virus
a. 50 % - 60 %
b. Methyl
c. 60% -70 %
d. 40% - 50%
21. What preventive measures are recommended or required for the symptomatic as well as asymptomatic individuals that may help reduce or stop the spread of the virus?
Select the correct answers:
a. Use of a mask to cover the mouth and nose outside of the house
b. Washing hands with soap and warm water for at least 20 seconds
c. Maintaining the distance of 6 feet from other people in public places
d. All of the above
22. The study on coronavirus has shown that the virus remains active outside the host cell and enters the respiratory tract through the mucous membranes, the virus shows sensitivity to all of the following agents, **EXCEPT?**
a. UV light
b. Hot water
c. Sunlight
d. Low temperature
23. The infected children had the symptoms of "pediatric multi-system inflammatory syndrome", experts suggest that the symptoms likely resemble which of the following condition?
a. Influenza
b. Kawasaki disease

Chairperson

FASALWADI SANGAREDDY 502294

- c. Marasmus disease
 - d. Toxic shock syndrome
24. In May 2020 Food and drug administration (FDA) gave approval to the pharmaceutical companies in the USA to further continue the phase 2 trials of a potential vaccine COVID-19. Phase 2 trials are assessed to observe the efficacy of the vaccine.

Which of the following is the most correct statement about the phase II trial of the vaccines?

- a. Few number volunteers who are at risk are given the determined doses of the drug
 - b. Few groups of individuals are given a very small dose of the new drug
 - c. Small groups of volunteers are given multiple doses of the drug
 - d. The efficiency and safety of the drug after it is available in the market is tested**
25. A 21-year-old male, working in a grocery store in California during the COVID-19 pandemic, developed a high fever, fatigue, and body ache similar to the symptoms of regular flu/common cold.

He was suspected of COVID-19 by his doctor, since he had mild symptoms the doctor recommended him to stay in isolation at home and asked only to visit the hospital if the symptoms get worse, such as difficulty in breathing.

All of the following statements are true about the diagnosis process of the COVID-19, EXCEPT?

- a. Nasal swab, throat swab, and saliva can be taken as a sample for the detection of the virus
 - b. The samples taken immediately after the exposure to the virus may give false-negative test results
 - c. A blood test is only the primary diagnostic test for the identification of the virus**
 - d. RT-PCR technique is used as a diagnostic test for the identification of the virus
26. All of the following are the personal protective equipment (PPE) a health care provider should wear when handling and testing both confirmed or suspected COVID-19 patients.

Select all the correct answers:

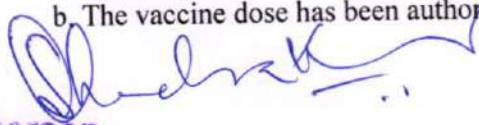

- a. Gloves
 - b. N95 mask
 - c. Eye protector
 - d. All of the above**
27. The use of masks has been proven to be one of the essential preventive measures for flu virus. All of the following mask-wearing practices can be helpful to reduce or stop the spread of COVID-19 infection, **Except?**
- a. Respirator masks and N95 masks are effective for health care workers
 - b. It should not be worn loosely and should cover your mouth, chin, and nose
 - c. Person tested negative for COVID-19 may not require mask in grocery stores**
 - d. Holding and touching the mask straps is the most safe and effective while wearing or removing the mask.

28. COVID-19 vaccine was approved by the CDC in the USA in April 2020, it has been found to be less effective and has shown severe side effects among some women since the first dose of the vaccine was given.

- a. Astrazeneca
- b. J&J/Janssen**
- c. Moderna
- d. Pfizer-BioNTech

29. Which of the following is a false statement regarding one of the first approved vaccines for COVID-19 by the FDA?

- a. The single dose of vaccine is sufficient**
- b. The vaccine dose has been authorized for ages 12 and older

About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

Objectives of the Programme:

- To improve nutritional and health status of girls in age group of 11 – 18 years.
- To provide required literacy and numeracy skills through the non-formal stream of education.
- To stimulate a desire for more social exposure knowledge and to help them improve their decision making capabilities.
- To train and equip the adolescent girls to improve and upgrade home-based and vocational skills.

Topics to be Covered

- Mental health.
- Sexual and reproductive health.
- Behavioral disorder
- Malnutrition
- Anaemia
- Eating disorders

MARKS: 30

Tick the Correct Answer

1. Which of the following is NOT a risk factor for adolescent depression?
 - a) Family of depression
 - b) Substance abuse
 - c) **High academic achievement**
 - d) Chronic illness
2. Which period marks the transition from childhood to adulthood?
 - a) Early Childhood
 - b) Middle Childhood
 - c) Preoperational period
 - d) **Adolescence**
3. Which of the following groups includes all STD?
 - a) Hepatitis-B, Hemophilia, AIDS
 - b) AIDS, Syphilis, Cholera
 - c) **Gonorrhea, Hepatitis-B, Chlamydia**
 - d) HIV, Malaria, Trichomoniasis
4. Which of the following is the widely accepted method of contraception in India?
 - a) **IUDs**
 - b) Tubectomy
 - c) Cervical caps
 - d) Diaphragms
5. The interferons are _____
 - a) Antibiotics
 - b) Antibacterial proteins
 - c) Immunosuppressive drugs
 - d) **Antiviral proteins**
6. Which of the following test is used to detect AIDS?
 - a) **Western blot and ELISA**
 - b) Northern blot and ELISA
 - c) ELISA and Southern blot
 - d) ELISA and Immunoblot

7. Growth curve is normally _____
 a) J shaped
b) S shaped
 c) C shaped
 d) V shaped
8. World population day falls on _____
 a) **11TH July**
 b) 11th may
 c) 10th July
 d) 10th may
9. Study of the human population is known as _____
 a) Anthropology
b) Demography
 c) Geography
 d) Ethnology
10. What is the function of copper-T?
 a) Stops cleavage
 b) Checks mutation
 c) Stops gastrulation
d) Stops fertilization
11. Amniocentesis is a process of _____
 a) Know about brain disease
 b) Grow cells on culture media
c) Determine disease of the embryo
 d) Determine mutations
12. Test tube baby employs which of the following technique?
 a) ICSI
b) ZIFT
 c) GIFT
 d) IUI
13. Part of bile juice useful in digestion is _____
 a) Bile pigments
b) Bile salts
 c) Bile matrix
 d) All of the mentioned
14. When starch is broken down by pancreatic amylase _____ is formed.
 a) Glucose
b) Maltose
 c) Peptides
 d) Amino acids
15. Which is the readily available source of energy in the body?
 a) Protein
b) Carbohydrates
 c) Lipids
 d) Vitamins

16. Pellagra is caused due to deficiency of _____
a) **Niacin**
b) Pantothenic acid
c) Tocopherol
d) Cyanocobalamine
17. A patient is advised to include more meat, lentils, milk and eggs in diet only when he suffers from _____
a) Maramus
b) Thyroid
c) Osteomalacia
d) **Kwashiorkar**
18. Gall stones or alcohol abuse can lead to _____
a) **Pancreatitis**
b) Cystitis
c) Pancreatic cancer
d) None of the mentioned
19. Diarrhea takes out too much of water and minerals which causes _____
a) Lack of energy
b) Dryness
c) Hunger
d) **Dehydration**
20. In gastric acid perforates, which of the following actions should not be included in the immediate management?
a) **Antacid administration**
b) Fluid and electrolyte replacement
c) Blood replacement
d) Nasogastric tube suction
21. The supporting and nutritive cells found in brains are _____
a) Oligodendrocytes
b) **Astrocytes**
c) Microglia
d) Ependymal cells
22. _____ is a quick response to the stimuli that passes the brain.
a) **Reflex action**
b) Voluntary action
c) Knee jerk
d) Receptors
23. Number of autosomes in human primary spermatocyte is _____
a) 46
b) **44**
c) 23
d) 22
24. Ovum receives the sperm in the region of _____
a) Animal pole
b) Equator
c) **Vegetal pole**
d) Pigmented area

25. A terrestrial animal must be able to _____
- a) Excrete large amount of water
 - b) Actively pump salts through skin
 - c) Excrete large amount of salts in urine
 - d) Conserve water**
26. Excretory waste of birds and reptiles are _____
- a) Urea
 - b) Uric acid and urea
 - c) Uric acid
 - d) Ammonia and uric acid**
27. Simultaneous movement of two molecules across a membrane in the same direction is known as _____
- a) Antiport
 - b) Symport**
 - c) Uniport
 - d) Biport
28. How many teeth appear twice during the life span of an individual?
- a) 16
 - b) 17
 - c) 20**
 - d) 32
29. The pH of saliva is?
- a) 9.5
 - b) 8
 - c) 7.5
 - d) 6.8**
30. Diastema is associated with _____
- a) Absence of teeth**
 - b) Organ of corti
 - c) Retinal cells
 - d) Presence of extra teeth

A ONE WEEK CERTIFICATE PROGRAM ON ADOLESCENT HEALTH

FINAL ASSESSMENT TEST

NAME:

REG.NO:

TIME: 30 Minutes

YEAR / SEM:

DATE:

MARKS: 30

Tick the Correct Answer

- Which of the following is NOT a risk factor for adolescent depression?
 - Family of depression
 - Substance abuse
 - High academic achievement
 - Chronic illness
- Which period marks the transition from childhood to adulthood?
 - Early Childhood
 - Middle Childhood
 - Preoperational period
 - Adolescence
- Which of the following groups includes all STD?
 - Hepatitis-B, Hemophilia, AIDS
 - AIDS, Syphilis, Cholera
 - Gonorrhoea, Hepatitis-B, Chlamydiae
 - HIV, Malaria, Trichomoniasis
- Which of the following is the widely accepted method of contraception in India?
 - IUDs
 - Tubectomy
 - Cervical caps
 - Diaphragms
- The interferons are _____
 - Antibiotics
 - Antibacterial proteins
 - Immunosuppressive drugs
 - Antiviral proteins
- Which of the following test is used to detect AIDS?
 - Western blot and ELISA
 - Northern blot and ELISA
 - ELISA and Southern blot
 - ELISA and Immunoblot

7. Growth curve is normally _____
a) J shaped
b) S shaped
c) C shaped
d) V shaped
8. World population day falls on _____
a) 11TH July
b) 11th may
c) 10th July
d) 10th may
9. Study of the human population is known as _____
a) Anthropology
b) Demography
c) Geography
d) Ethnology
10. What is the function of copper-T?
a) Stops cleavage
b) Checks mutation
c) Stops gastrulation
d) Stops fertilization
11. Amniocentesis is a process of _____
a) Know about brain disease
b) Grow cells on culture media
c) Determine disease of the embryo
d) Determine mutations
12. Test tube baby employs which of the following technique?
a) ICSI
b) ZIFT
c) GIFT
d) IUI
13. Part of bile juice useful in digestion is _____
a) Bile pigments
b) Bile salts
c) Bile matrix
d) All of the mentioned
14. When starch is broken down by pancreatic amylase _____ is formed.
a) Glucose
b) Maltose
c) Peptides
d) Amino acids
15. Which is the readily available source of energy in the body?
a) Protein
b) Carbohydrates
c) Lipids
d) Vitamins

Date: 11.01.2021

PROGRAM REPORT

Name of the Event : A One week Certificate Program on "Adolescent Health"

Date : 04.01.2021 to 09.01.2021

Resource Person : Dr. LINGARAJ

Professor and HOD / General Medicine,

Dr. Rakesh Dhir

Asst.Professor / Medicine

Dr. Shahid Ansari

Asst.Professor / Medicine

MNR Medical College,

Email ID: sandhya@gmail.com

Name of the Coordinator: Dr.Syed

Number of Students attended: 98

Venue: Lecture Hall

OBJECTIVE OF THE PROGRAM:

- To improve nutritional and health status of girls in age group of 11 – 18 years.
- To provide required literacy and numeracy skills through the non-formal stream of education.
- To stimulate a desire for more social exposure knowledge and to help them improve their decision making capabilities.
- To train and equip the adolescent girls to improve and upgrade home-based and vocational skills.

Chairperson

About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

Objectives of the Programme:

- Describe the principles and practice of asepsis
- Understand hand hygiene
- Understand the role of the environment in disease transmission
- Understand some basic concepts of research and its methodologies

Topics to be Covered

- Aseptic technique types
- Barriers Viz.. Sterile gloves, masks, sterile drugs
- Patient and equipment preparation
- Environmental controls
- Contact guidelines
