Fasalwadi, Sangareddy, Hyderabad

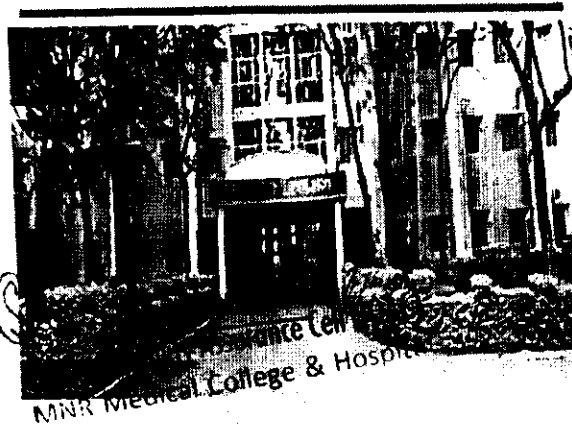

Telangana-502 294

INDIA

About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

Objectives of the Programme:

- Recognize the most common causes and list the four "T's" in the differential diagnosis of acute PPH.
- Outline a systematic approach to emergency treatment of PPH. List commonly available options for pharmacological management. Perform simple procedural and surgical management.
- Outline an approach to management of PPH refractory to simple measures. Manage lower segment bleeding, uterine rupture, and refractory uterine atony that may occur after cesarean delivery. Be able to use laparotomy to address refractory PPH.
- Anticipate and prepare for emergency peripartum hysterectomy (EPH) in a patient with identified risk factors. Identify the team, equipment, and skills required to perform EPH. Outline a technique for rapid subtotal hysterectomy.

Topics to be Covered

- Introduction
- Active management of third stage of labour.
- Prevention of Postpartum hemorrhage
- Diagnosis of Postpartum hemorrhage
- Recent advances in management of Postpartum hemorrhage
- Assessment of blood loss

person
Internal Quality Assurance Cell (IQAC)

Objectives of the Programme:

- The fundamental aim of histology is to determine how tissues are organized at all structural levels, from cells and intercellular substances to organs.
- Histology is used in the diagnostic and research setting for the diagnosis of human or animal tissue samples including autopsy and forensic specimens to gain a better understanding of biological processes.
- The study of the microscopic anatomy of cells and tissues of plants and animals, particularly the tissues

Topics to be Covered

- Introduction – Principles of Staining
- Special stains in Histopathology.
- Tissue Processing
- Staining methods
- Advance Histology techniques
- Importance of staining in Histology

Internal Organ Transplant Cell (IOAC)
MNR Medical College & Hospital

Objectives of the Programme:

- Demonstrate a thorough pain assessment using a standardized assessment schema
- Demonstrate knowledge of initial treatment approaches to manage somatic pain, neuropathic pain, and visceral pain.
- Describe the mechanisms of action/pharmacological principles associated with use of morphine, hydromorphone, oxycodone and fentanyl for pain (dose-time efficacy curves for oral, transdermal and parenteral administration, and common toxicities).
- State the indications (and contra-indications) for use, starting dose, and dose titration schema for short acting and long-acting opioids, for both oral and parenteral administration; one anticonvulsant and one anti-depressant drug for neuropathic pain.

Topics to be Covered

- Introduction
- Types of pain.
- Palliative care methods
- Cancer pain relief
- NICE guidelines for management of Neuropathic pain.
- Palliative performance scale which is tool used to assess the patient.

Objectives of the Programme:

- Define mild and severe preeclampsia
- Understand the pathophysiology of preeclampsia
- Identify patients at risk of preeclampsia and discuss prevention strategies
- Recognize and explain possible maternal consequences of preeclampsia
- Explain and discuss the management of preeclampsia.

Including:

- i) Assessment of maternal condition
 - ii) Assessment of fetal condition
 - iii) Delivery considerations, including timing and mode of delivery
 - iv) Medication considerations, including antihypertensive drugs, analgesics, MgSO₄, drug availability and preparing and mixing drugs
- Discuss delivery considerations in preeclampsia
 - Discuss research to come to evidence based medicine guidelines for low- and middle income country setting

Topics to be Covered

- Introduction
- Eclampsia Pathophysiology
- Clinical features of Eclampsia
- Management of Eclampsia
- Complications

About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

MNR Medical College & Hospital

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for faculty, guests, and VIPs.

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

Objectives of the Programme:

- Demonstrate a thorough pain assessment using a standardized assessment schema
- Demonstrate knowledge of initial treatment approaches to manage somatic pain, neuropathic pain, and visceral pain.
- Describe the mechanisms of action/pharmacological principles associated with use of morphine, hydromorphone, oxycodone and fentanyl for pain (dose-time efficacy curves for oral, transdermal and parental administration, and common toxicities).
- State the indications (and contra-indications) for use, starting dose, and dose titration schema for short acting and long-acting opioids, for both oral and parenteral administration; one anticonvulsant and one anti-depressant drug for neuropathic pain.

Topics to be Covered

- Introduction
- Types of pain.
- Palliative care methods
- Cancer pain relief
- NICE guidelines for management of Neuropathic pain.
- Palliative performance scale which is tool used for patient.

All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

Objectives of the Programme:

- To reduce the incidence of and mortality due to TB.
- To prevent further emergence of drug resistance and effectively manage drug-resistant TB cases.
- To reduce the suffering and socioeconomic burden associated with TB.
- To protect poor and vulnerable populations from TB, TB/HIV and multidrug-resistant TB.
- To support development of new tools and enable their timely and effective use.
- Maintain the treatment success rate at 90% patients (all forms of TB) through to 2021.

Topics to be Covered

- Introduction
- Nation TB Programme
- RNTCP (Reversed National TB Programme)
- DOTS Strategy
- Programmatic treatment of drug resistance T.B
- National Strategic plan 2017-2025.

Objectives of the Programme:

- Discuss the basic rules to activate Emergency Management System (EMS)
- Outlining on assessing first aid priorities & the accidental scene.
- Explaining the methods of accessing casualty through Primary & Secondary Survey.
- Represent on how to provide Cardio Pulmonary Resuscitation (CPR)
- Configuration the steps involved in using Automated External Defibrillator (AED)
- Discussion on the signs, symptoms & management plan of action for various life-threatening conditions.
- Outlining the basic requirements of a first aid kit.

Topics to be Covered

- Introduction
- Life saving skills
- Injuries
- Medical conditions
- First - aid Supplies
- Trained assessments

Objectives of the Programme:

- The aim of basic life support includes preserving life, preventing injury from getting worse, aiding recovery, relieving pain, and protecting the unconscious. The main objective is to save lives.
- The major objective of BLS is to provide oxygen to the heart and the brain and to sustain tissue viability until definitive electrical or medical treatment.
- Basic Life Support (BLS) course provides healthcare providers and public safety professionals the knowledge and skills necessary to respond to breathing and cardiac emergencies in adult, child and infant patients.

Topics to be Covered

- Introduction, Basic Concepts.
- CPR (Cardiopulmonary resuscitation) in adults.
- CPR (Cardiopulmonary resuscitation) in Pediatrics and Infants.
- Cardiac Arrest.
- AED (Automated external defibrillator) for adults and infants.
- Foreign Body.

Objectives of the Programme:

- Explain the neural origins of EEG data
- Explain, in basic terms, how EEG is recorded
- Explain the difference between time- and frequency-domain treatments of EEG data
- Explain the rationale for fundamental EEG data preprocessing operations, including:
 - o filtering
 - o event code processing
 - o segmentation (epoching)
 - o artifact removal
 - o averaging

Topics to be Covered

- Introduction and terminology.
- Anatomy and neurological disorders.
- EEG technology
- EEG history & concepts
- EEG pattern recognition
- Conclusion

Objectives of the Programme:

- Recognize the most common causes and list the four "T's" in the differential diagnosis of acute PPH.
- Outline a systematic approach to emergency treatment of PPH. List commonly available options for pharmacological management. Perform simple procedural and surgical management.
- Outline an approach to management of PPH refractory to simple measures. Manage lower segment bleeding, uterine rupture, and refractory uterine atony that may occur after cesarean delivery. Be able to use laparotomy to address refractory PPH.
- Anticipate and prepare for emergency peripartum hysterectomy (EPH) in a patient with identified risk factors. Identify the team, equipment, and skills required to perform EPH. Outline a technique for rapid subtotal hysterectomy

Topics to be Covered

- Introduction
- Active management of third stage of labour.
- Prevention of Postpartum hemorrhage
- Diagnosis of Postpartum hemorrhage
- Recent advances in management of Postpartum hemorrhage
- Assessment of blood loss

Shardha
Chairperson
Internal Quality Assurance Cell (IQAC)
MNR Medical College & Hospital

Objectives of the Programme:

To develop a protective vaccine/ immunization programme for all infectious diseases, although some pathogens are considerably more challenging candidates than others. Whether or not such vaccines are developed and deployed is related to the severity and economic impact of the disease on the community as well as the effects upon the individual. Various factors governing the likelihood of an immunization programme being adopted are discussed below.

1. Disease Severity
2. Vaccine Effectiveness
3. Safety
4. Public Perceptions
5. Cost
6. Longevity of Immunity

Topics to be Covered

- Aims of Immunization.
- Immune system & how vaccines work.
- National Immunization Schedule (NIS)
- Vaccine preventable diseases.
- Different types of vaccines.
- Storing & handling of vaccines.
- Administration of vaccines.

MNR MEDICAL COLLEGE & HOSPITAL
FASALWADI, SANGAREDDY-502294

About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

Chairperson
Internal Quality Assurance Cell (IIAQ)
MNR Medical College & H.

Objectives of the Programme:

- To know the stages of development of human embryo Ability to compare human embryo with different other species
- To know the factors that affect embryogenesis, teratogenesis, & methods to treat or prevent them.
- To know the development of various body organ developments & how anomalies may develop.
- An overview of environmental teratogenic agents

Topics to be Covered

- Fertilization
- Embryonic development
- Fetal differentiation
- Growth development
- Child birth

It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

MNR Hospital is a 760 bedded multispecialty hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

Shandana
Chairperson
Internal Quality Assurance Cell (IQAC)
MNR Medical College & Hospital

Objectives of the Programme:

- The fundamental aim of histology is to determine how tissues are organized at all structural levels, from cells and intercellular substances to organs.
- Histology is used in the diagnostic and research setting for the diagnosis of human or animal tissue samples including autopsy and forensic specimens to gain a better understanding of biological processes.
- The study of the microscopic anatomy of cells and tissues of plants and animals, particularly the tissues.

Topics to be Covered

- Introduction – Principles of Staining
- Special stains in Histopathology.
- Tissue Processing
- Staining methods
- Advance Histology techniques
- Importance of staining in Histology.

About the Institute

MNR Medical College and its allied institutions have been progressing steadily since its formation in the year 2001. It has started with an initial intake of 100 students however, MNR is very proud to enroll around 5000 students till date. It gives an immense satisfaction that we have produced so many competent professionals who are serving the nation in better ways. College provides the best of facilities to its students, giving them a lasting memorable impression which they can cherish all through their lives. It offers undergraduate, post-graduate, and diploma programs in Medicine & Health Sciences. It is affiliated with the KNR University of Health Sciences and is recognized by the National Medical Commission (NMC), Govt. of India. College building is housed in an ultramodern structure. It houses department-wise lecture galleries, laboratories, research labs, demo rooms, and libraries. The campus also has a full-fledged communication center, conference hall, 1400-seat auditorium, vast playgrounds, an administration block and a canteen with separate dining halls for students, faculty, guests, and VIPs.

MNR Hospital is a 760 bedded modern hospital well-equipped with quality infrastructure aligned with international standards, skilled & experienced staff, with 24-hour emergency health-care services. All its departments are computerized and linked to a campus-wide LAN. The usage of the latest technology is immensely benefiting the patients, doctors, and students, as data saved can be shared seamlessly for clinical and administrative purposes. All Departments such as General Medicine, Surgery, Cardiology, ENT, Pediatrics, Gynecology, Orthopedics, Ophthalmology, TB and Chest, Gastroenterology, Psychiatry, Dermatology, Urology, Neurology, along with Diagnostic and all other medical facilities are available under the same hospital roof.

Objectives of the Programme:

- Recognize the most common causes and list the four "T's" in the differential diagnosis of acute PPH.
- Outline a systematic approach to emergency treatment of PPH. List commonly available options for pharmacological management. Perform simple procedural and surgical management.
- Outline an approach to management of PPH refractory to simple measures. Manage lower segment bleeding, uterine rupture, and refractory uterine atony that may occur after cesarean delivery. Be able to use laparotomy to address refractory PPH.
- Anticipate and prepare for emergency peripartum hysterectomy (EPH) in a patient with identified risk factors. Identify the team, equipment, and skills required to perform EPH. Outline a technique for rapid subtotal hysterectomy.

Topics to be Covered

- Introduction
- PPH Diagnosis Management
- Retained placenta of diagnosis and Management
- Inversion of Uterus

Objectives of the Programme:

- Describe the Pathophysiology of Epistaxis
- Familiar with relative Nasal anatomy
- Outline initial patient assessment of the Epistaxis patient
- Describe nasal exam and management techniques for Epistaxis
- Formulate an appropriate evaluation and treatment plan.

Topics to be Covered

- Vascular Anatomy of Nose
- Classification of Epistaxis.
- Causes of Epistaxis.
- Management of Anterior Epistaxis.
- Management of Posterior Epistaxis.
- Epistaxis in geriatric patients.
