Reference No: [51060]

[CEREBRAL HEMIATROPHY WITH OSSEOCUTANEOUS INVOLVEMENT -RADIOLOGICAL DIAGNOSIS AND DIFFERENTIAL DIAGNOSIS OF DYKE DAVIDSON MASON SYNDROME]

Dear Dr pyadala nagababu

We would be grateful, if you could critically review the Case Report[First submission], received by us. We are putting in this request because either you are registered with JCDR in this specialty or name has been suggested by the author of the article or while doing internal assessment of the article we found that you have also published on similar or same topic.

As per the policy of the journal we have removed the title pages and request you to write in your comments in the comment form.

Manuscript and the comments form can be downloaded from JCDR Pre Publishing
(if the link does not work, type the url <http://www.jcdr.org.in> in the browser address field.)

Please use the Log in as : genomix_p
and Password as : Malliswari55

Further, we would be obliged if you could upload the review form and your comments within the stipulated time (expected [27/07/2021]).

Kindly let us know immediately if this is not possible, for example you are not available or on closer inspection you realize that you have a substantial conflict of interest with this manuscript or the area is out of your interest of topic or you will not be able to spare time.

If you will not be reviewing the article please do inform us. We will forward the article to another peer reviewer. This will save time for decision on manuscript for the author.

Click the link below to inform the editor.

I will be able to review this article.

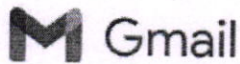

I deny to do this article.

I do not wish asked to review for JCDR.

Regards,
Dr. Hemant Jain
Chief Editor

**International Journal of Science and Research (IJSR)**

www.ijsr.net

ISSN (Online): 2319-7064

Article Review InvitationDear **Dr. Nagababu Pyadala**,We trust this Email finds you well! We are contacting you based on your expertise in **Biochemistry**.

Currently, We have received the article titled "**THE SIGNIFICANCE OF TRANSAMINASES AND DERITIS RATIO FOR PREDICTING ALCOHOLIC LIVER DISEASE**" for possible consideration in the **International Journal of Science and Research (IJSR)** scheduled for publication in **Volume 12 Issue 1, January 2023**.

In order to strengthen the overall quality of this publication, We would like to kindly invite you to assist us in the review process of this publication.

You may **Download Article Here** for review and evaluation of its potential for publication. An evaluation form can be found at this link **Article Evaluation Link**, it is to be used to record your comments regarding the article.We would kindly request you please submit your completed evaluation form by no later than **29/12/2022 by 11:59 PM IST**. Submitting the Review Report within the given deadline will earn you **Official Reviewer Certificate** and also **100 Credit Points** from the Journal which you can redeem for your own or your Referral's publication with us.

We will be sharing your comments with the author(s), so your constructive and candid comments are appreciated. Your thoroughness and detail will both assist the author(s) in improving and revising their submission(s) and will ultimately lead to a publication of the highest quality.

You can always Sign In to your IJSR Account at this link **Member Sign In** and check your Activities and Credit Score.If you're unable to take on this review assignment but know of other scholars who may be interested and have the necessary expertise, we would greatly appreciate you sharing suggestions for alternate peer reviewers. We appreciate you considering this review assignment and look forward to hearing from you. If you have any questions, please don't hesitate to contact us at **editor.ijsrnet@gmail.com**.

[JMS] Registration as Reviewer with Journal of Medical Science Inbox

Jan Krzysztof Nowak <jan.nowak@ump.edu.pl> to me Tue.

In light of your expertise, we have taken the liberty of registering your name in the reviewer database for Journal of Medical Science commitment on your part, but simply enables us to approach you with a submission to possibly review. On being invited to review, the title and abstract of the paper in question, and you'll always be in a position to accept or decline the invitation. You can also ask removed from this reviewer list.

We are providing you with a username and password, which is used in all interactions with the journal through its website. You may profile, including your reviewing interests.

Username: npyadala
Password: eY8JMh

Thank you,
Prof. Jaroslaw Walkowiak, M.D., Ph.D.

Career Profile

A strong, committed and self-motivated candidate with a wealth of academic background within Medical Biochemistry: current professional exposure to the assistance and exhibition of Biochemistry laboratory techniques: exceptional research and critical thinking abilities: good team collaboration and cross cultural competencies: strong communication and interpersonal abilities: good cognitive load management and design mindset capabilities.

Key

Skills

- Excellent knowledge base within Medical Biochemistry, with current professional exposure to the assistance and exhibition of Biochemistry laboratory techniques; able to exercise the following laboratory techniques: RT-PCR, Gel-electrophoresis, Automatic Biochemistry Analyzer, Biochip technology, Fluorescence microscopy, ENZYME-Linked Immunosorbent Assay, Serological techniques, and speciation, sterilization, disinfection techniques.
- Exceptional research and critical thinking abilities; able to recognize and validate problems; able to develop theoretical concepts through critical thinking; able to understand relevant research methodologies and techniques and their appropriate application; able to critically analyze and evaluate findings; able to summarize, document, report and reflect on research progress.
- Good team collaboration and cross cultural competencies; able to develop and maintain co-operative networks and working relationships with supervisors, colleagues and peers, within the institution and the wider research community; able to understand one's behaviors and impact on others when working in and contributing to the success of formal and informal teams.
- Strong communication and interpersonal abilities; able to write clearly and in a style appropriate to purpose; able to construct coherent arguments and articulate ideas clearly to a range of audiences, formally and informally through a variety of techniques; effectively supports the learning of others when involved in teaching, mentoring or demonstrating activities.
- Good cognitive load management and design mindset capabilities; able to discriminate and filter information for importance and to understand how to maximize cognitive functioning using a variety of tools and techniques; able to represent and develop tasks and work processes for desired outcomes.

Education and Qualification

2002 – 2005
Hindu college, Guntur, India

2005-2010

BSc. BZC (Botany, Zoology, Chemistry.)

MSc. Medical Biochemistry

Title: CEREBRAL HEMIATROPHY WITH OSSEOCUTANEOUS INVOLVEMENT -RADIOLOGICAL DIAGNOSIS AND DIFFERENTIAL DIAGNOSIS OF DYKE DAVIDSON MASON SYNDROME

Dear Dr

We have received an article entitled as above. On reviewing the literature we find that you have expertise in this field and have in past published related works. We are a peer reviewed journal and always try to reach people most suited to evaluate the manuscripts. In this regard we would like to request you to honorary peer review this manuscript for us. Following is the abstract of the article.

Cerebral atrophy is a cause of CNS dysfunction in the pediatric population leading to cognitive impairment, seizures, hemiplegia, behavioral & emotional problems .
MRI due to its multiplanar capabilities and excellent soft tissue resolution is the best modality to diagnose unilateral cerebral atrophy .
Many syndromes can be associated with cerebral atrophy . It is important to be aware of the cutaneous manifestations of these neurocutaneous syndromes in order to differentiate and arrive at the appropriate diagnosis. We are presenting the clinical and radiological findings of Dyke Davidson Mason syndrome in a paediatric patient to highlight how unilateral cerebral atrophy can silently manifest and how important it is to differentiate the various conditions associated with cerebral hemiatrophy.

If you will send your affirmative we will forward the full article formally.
We shall be thankful to you for your valuable time and will be waiting for your response.
Please do reply back to this mail, even if you refuse to review.

Regards

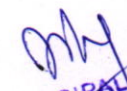

Dr. Hemant Jain
Chief Editor
Journal of Clinical and Diagnostic Research
