Number of participants: 43

Objective of the program

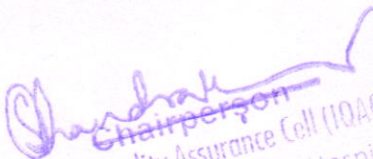

The primary objective of clinical research studies includes improvement in patient management. Most clinical research studies are aimed at discovering a new/novel drug to treat a medical condition that presently has no specific treatment, or the available drugs are not particularly effective in curing the disease.

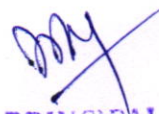

Contents Delivered

- 1) Exploratory research and aims -
- 2) Descriptive aims -
- 3) Causal- Thank you for reading our article about aims of researches.

Outcome of the program

The participants of the program will get an idea about the "Clinical Research - Regulations and Guidelines". Outcomes (also called events or endpoints) are variables that are monitored during a study to document the impact that a given intervention or exposure has on the health of a given population. Typical examples of outcomes are cure, clinical worsening, and mortality.
